(315) TIDE TABLES—TIDAL DIFFERENCES FOR ADDITIONAL LOCALITIES.

Since 1901, the Tidal Survey branch of this Department has issued Tide Tables for the Pacific coast of Canada. The two principal stations for which tide tables are calculated and published are Victoria, and Sand heads at the mouth of the Fraser river. The tide tables published for 1904 are based upon a continous tidal record, day and night, during two complete years at each of these stations. The tide throughout the Strait of Georgia is referred to Sand heads; and the differences given for Vancouver, New Westminster, and Baynes sound are based on actual simultaneous observations at those ports.

Further observations are now in progress on the outer coast, at Bamfield in Barkley sound, and at Port Simpson. A record during 3½ months has also been obtained at Alert bay in Queen Charlotte sound. Tidal differences, from a preliminary reduction of these records, are given below. They are based upon a comparison of the observed tides with the tide tables of the United States Coast Survey, as published. The tables for Astoria are based upon two years of observation, and for Sitka upon only one year.

Barkley sound, Vancouver island. (At Bamfield).—Subtract from the time of the tide at Astoria :—

For High Water, 29m. For Low Water, 32m.

Alert bay, Queen Charlotte sound.—Add to the time of the tide at Sitka :—

For High Water, 45m. For Low Water, 51m.

Port Simpson.—Add to the time of the tide at Sitka :—

For High Water, 53m. For Low Water, 54m.

The tide tables for Sitka are published in 135th meridian time; but all the results given by these differences, are in Pacific Standard time, for the 120th meridian west of Greenwich.

(308) RIVER ST. LAWRENCE—THOUSAND ISLANDS—UNCHARTED SHOALS BELOW CLAYTON.

Major Theo. A. Bingham, Corps of Engineers, U.S.A., reports the existence of 6 uncharted shoals in the river St. Lawrence below Clayton. These shoals are all small points of rock and are more dangerous to the numerous steam yachts plying on the river in this locality than to freight boats. Their positions, given approximately, are as follows :

A 10-foot spot in the shoal water extending northeasterly from Calumet island lies 1,200 feet S. 67° E. from the northeasterly point of that island, and 2,600 feet N. 39° W. from the northwesterly point of Washington island.

A 12-foot spot lying 2,900 feet north of the northwesterly point of Washington island is 2,400 feet N. 69° E. from the above 10-foot spot, and 3,500 feet N. 71° W. from the westerly point of Round island.

An 8-foot spot lies 350 feet S. 62° E. from the east point of Beckwith island, 2,750 feet S. 17° W. from the most southerly projection of Bluff island, and 2,300 feet N. 55° W. from the most westerly point of North Colborne island.

A 5½-foot spot lies 2,750 feet S. 62° E. from the most southerly projection of Bluff island, and on a line from the most westerly point of North Colborne island to the southwesterly point of Packenham island, bearing N. 27° E., being distant 2,900 feet from the former and 3,200 feet from the latter point.

The small island lying almost in line between the 8-foot and 5-foot spots is called Gull island.

Two spots with only 4½ and 3½ feet of water on them were found in the shoal area south of Grennell island, within a distance of less than 500 feet of each other, and lying west and east, respectively, of a charted depth of 19 feet which is on a line between the east point of Packenham island and the southeasterly projection of Grennell island. The 4½-foot spot is distant 2,400 feet N. 82° E., and the 3½-foot spot 2,800 feet N. 84° E. from the most easterly point of Packenham island.

(309) LAKE ERIE—CONNEAUT HARBOUR—GENERAL INFORMATION.

The opening through the west pier into the channel, Conneaut harbour, Ohio, as a result of contractors' operations, is now about 325 feet long. Sand has drifted through the opening, forming a shoal that now extends to the centre of the channel.

About 100 feet north of the inner end of the east pier there is a shoal in the channel that cannot be crossed by vessels drawing more than 18 feet.

Vessels entering the harbour should keep a little to the westward of the axis of the channel until the bow is nearly abreast the end of the east pier and then follow the channel to the eastward of the axis.

A bar has formed across the channel about 400 feet outside of the west pier and vessels drawing 18 feet or more are liable to get aground on it.

(310) RIVER ST. MARY—SAULT STE. MARIE—MARINE RAILWAY ESTABLISHED.

A marine railway has been established at Sault Ste. Marie, Michigan, details of which are as follows:—

Length on keel blocks, 190 feet ; width, 42 feet ; extreme draft, outboard end, 14½ feet ; extreme draft, inboard end, 8 feet ; capacity, dead weight, 1,000 tons.

Machinery of all kinds, calking and general repairs to wooden vessels may be had.

(311) LAKE SUPERIOR—ASHLAND—CHANNEL DEPTHS.

The Government channel which extends along a portion of the harbour front was extended 900 feet southwestward by dredging in June, 1903. This extension is 100 feet wide, its south side being 60 feet from the end of the Barker & Stewart Lumber Company's dock No. 2, and extends from a point on the prolonged centre line of Eleventh avenue, west (the termination of the former channel), to about 100 feet west of the prolonged west line of Beaser avenue and opposite the middle of dock No. 4 of the lumber company.

Soundings of this extension, taken September 16, 1903, show the new channel to have, generally, a depth of 20 feet, and a least depth of about 19 feet. The depth on the bottom near the channel is about 13 feet. These depths are at low water datum, the actual depth at the present time, 16th October, 1903, being about 1½ feet more. A vessel could not turn in the channel, but would have to back out until it reached deep water or a slip leading off the main channel. No buoys mark the channel.

(312) LAKE SUPERIOR—PORT WING HARBOUR—INFORMATION.

An examination of the entrance channel was made on 14th September, 1903, by running a line of soundings at a distance of 15 feet east of the vessel range and at intervals of about 29 feet. The least depth found on this line abreast the new pier (800 feet long) was 15.2 feet. This depth would decrease to 13.6 feet at low water datum, which is 1.6 feet below the actual stage at that time. Beyond the pier in the lake the water was deeper, the least depth found being 17½ feet at the existing stage. Vessels load with lumber to 14 feet and have no trouble in passing out.

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 20 de février 1901, l'article 53*a* des règlements concernant les mines quartzeuses ont été modifiés en décrétant que le droit régalien à imposer sur les ventes des produits d'une concession minière n'excèderait pas cinq pour cent ;

Et considérant qu'à l'époque où a été passé l'arrêté en conseil du 20 de février 1901, le droit régalien sur l'or extrait en vertu des dispositions des règlements concernant les mines alluviales dans le territoire du Yukon était de dix pour cent du rendement brut, et depuis a été réduit à deux et demi pour cent sur la valeur de l'or exporté, mais aucun changement n'a été fait dans le droit régalien prélevé en vertu des dispositions des règlements concernant les mines quartzeuses,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon*, tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, que l'article 53*a* des susdits règlements concernant les mines quartzeuses soit et il est par le présent rescindé, et remplacé par le suivant:—

"La patente pour une concession minière réservera à la Couronne pour toujours le même droit régalien sur les produits de la concession qui est établi ou qui sera plus tard établi dans les règlements concernant les mines alluviales. Au Manitoba et dans les territoires du Nord-Ouest et dans les districts provisoires d'Ungava, Kéwatin, Mackenzie et Franklin la patente d'une concession minière réservera à la Couronne pour toujours un droit régalien n'excédant pas deux et demi pour cent des ventes des produits de la concession, le droit régalien sera prélevé de la manière que prescrira le ministre de l'Intérieur. Le même droit régalien sera prélevé sur les ventes qui pourront être faites avant l'émission de la patente."

JOHN J. McGEE,
Greffier du Conseil privé.

BRITISH COLUMBIA.

(315) TIDE TABLES—TIDAL DIFFERENCES FOR ADDITIONAL LOCALITIES.

Since 1901, the Tidal Survey branch of this Department has issued Tide Tables for the Pacific coast of Canada. The two principal stations for which tide tables are calculated and published are Victoria, and Sand heads at the mouth of the Fraser river. The tide tables published for 1904 are based upon a continous tidal record, day and night, during two complete years at each of these stations. The tide throughout the Strait of Georgia is referred to Sand heads; and the differences given for Vancouver, New Westminster, and Baynes sound are based on actual simultaneous observations at those ports.

Further observations are now in progress on the outer coast, at Bamfield in Barkley sound, and at Port Simpson. A record during 3½ months has also been obtained at Alert bay in Queen Charlotte sound. Tidal differences, from a preliminary reduction of these records, are given below. They are based upon a comparison of the observed tides with the tide tables of the United States Coast Survey, as published. The tables for Astoria are based upon two years of observation, and for Sitka upon only one year.

Barkley sound, Vancouver island. (At Bamfield).—Subtract from the time of the tide at Astoria :—

For High Water, 29m. For Low Water, 32m.

Alert bay, Queen Charlotte sound.—Add to the time of the tide at Sitka :—

For High Water, 45m. For Low Water, 51m.

Port Simpson.—Add to the time of the tide at Sitka :—

For High Water, 53m. For Low Water, 54m.

The tide tables for Sitka are published in 135th meridian time; but all the results given by these differences, are in Pacific Standard time, for the 120th meridian west of Greenwich.

ÉDOUARD SEPT, par la Grâce de Dieu, Roi du Royaume-Uni de la Grande-Bretagne et d'Irlande et des possessions britanniques au delà des mers, Défenseur de la Foi, Empereur des Indes.

A tous ceux qui les présentes verront ou qu'icelles pourront concerner,—SALUT :

PROCLAMATION.

E. L. NEWCOMBE,
Député du ministre de la
Justice, Canada.

CONSIDÉRANT que dans et par les Statuts revisés du Canada, chapitre 68 intitulé "Acte concernant la quarantaine" il est entre autres choses en substance statué, que le Gouverneur en conseil peut établir au besoin les règlements qu'il jugera à propos pour la mise à exécution de toutes les prescriptions du présent acte, et, entre autres choses, pour l'établissement de stations ou endroits quarantenaires où devra se faire la quarantaine, et que ces règlements seront publiés au moins deux fois dans la *Gazette du Canada ;*

Et considérant qu'il a plu à Notre Gouverneur général en conseil d'ordonner que les règlements de quarantaine faits dans et par un certain arrêté en conseil de Notre Gouverneur général en conseil du 18e jour d'août dans l'année de Notre-Seigneur mil huit cent quatre-vingt-dix-huit, tel que le dit arrêté a été jusqu'à présent modifié, soit de nouveau modifié tel que ci-après énoncé, et que cette modification soit publiée par proclamation tel que le prescrit le dit acte,—

A ces causes, en conformité des dispositions du dit acte, et par et avec l'avis de Notre Conseil privé pour le Canada, Nous proclamons et déclarons que le paragraphe (*b*) de l'article 1 des dits règlements de quarantaine, tels que modifiés jusqu'à présent, a été modifié en insérant les mots "aussi Louisbourg" après le mot "Lawlor" dans la première ligne du dit paragraphe, constituant ainsi le Port de Louisbourg une station de quarantaine.

De ce qui précède Nos féaux sujets et tous ceux que les présentes peuvent concerner, sont par les présentes requis d'en prendre avis et d'agir en conséquence.

EN FOI DE QUOI, Nous avons fait émettre nos présentes Lettres Patentes, et à icelles fait apposer le Grand Sceau du Canada. TÉMOIN, Notre Très fidèle et Bien-aimé Cousin et Conseiller le Très honorable Sir GILBERT JOHN ELLIOT, Comte de Minto et Vicomte Melgund de Melgund, comté de Forfar, dans la pairie du Royaume-Uni, Baron Minto de Minto, comté de Roxburgh, dans la pairie de la Grande-Bretagne, Baronnet de la Nouvelle-Ecosse, Chevalier Grand-croix de Notre Ordre Très distingué de Saint-Michel et Saint-George, etc., etc., Gouverneur Général du Canada.

ARRETÉS EN CONSEIL.

[RENV. 454,691]

HOTEL DU GOUVERNEMENT À OTTAWA.

Samedi, le 28e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 20 de février 1901, l'article 53*a* des règlements concernant les mines quartzeuses ont été modifiés en décrétant que le droit régalien à imposer sur les ventes des produits d'une concession minière n'excèderait pas cinq pour cent ;

Et considérant qu'à l'époque où a été passé l'arrêté en conseil du 20 de février 1901, le droit régalien sur l'or extrait en vertu des dispositions des règlements concernant les mines alluviales dans le territoire du Yukon était de dix pour cent du rendement brut, et depuis a été réduit à deux et demi pour cent sur la valeur de l'or exporté, mais aucun changement n'a été fait dans le droit régalien prélevé en vertu des dispositions des règlements concernant les mines quartzeuses,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon*, tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, que l'article 53*a* des susdits règlements concernant les mines quartzeuses soit et il est par le présent rescindé, et remplacé par le suivant:—

"La patente pour une concession minière réservera à la Couronne pour toujours le même droit régalien sur les produits de la concession qui est établi ou qui sera plus tard établi dans les règlements concernant les mines alluviales. Au Manitoba et dans les territoires du Nord-Ouest et dans les districts provisoires d'Ungava, Kéwatin, Mackenzie et Franklin la patente d'une concession minière réservera à la Couronne pour toujours un droit régalien n'excédant pas deux et demi pour cent des ventes des produits de la concession, le droit régalien sera prélevé de la manière que prescrira le ministre de l'Intérieur. Le même droit régalien sera prélevé sur les ventes qui pourront être faites avant l'émission de la patente."

JOHN J. McGEE,
27–4 Greffier du Conseil privé.

[Renv. 454,553.]

HOTEL DU GOUVERNEMENT À OTTAWA.

Jeudi, le 26e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par l'article 4 des règlements concernant les mines quartzeuses établis par arrêté en conseil du 21 de mars 1898, il est décrété qu'un certificat de mineur libre peut être accordé pour un an ou plus mais n'excédant pas cinq, moyennant le paiement des honoraires énoncés dans le tarif des honoraires annexé aux dits règlements ; et par le tarif mentionné dans les susdits règlements l'honoraire exigé pour un certificat de mineur libre délivré en faveur d'un individu sera de $10.00 ; et

Considérant que l'honoraire pour ce certificat de mineur libre acquis en vertu des dispositions concernant les mines alluviales dans le territoire du Yukon a été réduit à $7.50 par un arrêté en conseil daté le 31 de mars 1903,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon* tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, et il est par le présent ordonné que le tarif annexé aux règlements des mines quartzeuses établis par arrêté en conseil au 21 de mars 1898, soit modifié en retranchant l'honoraire de $10 qui y est stipulé pour un certificat de mineur libre, et y substituant $7.50.

JOHN J. McGEE,
27–4 Greffier du Conseil privé.

ARRÊTÉS EN CONSEIL.

[Renv. 454,691]

HOTEL DU GOUVERNEMENT A OTTAWA.

Samedi, le 28e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 20 de février 1901, l'article 53*a* des règlements concernant les mines quartzeuses ont été modifiés en décrétant que le droit régalien à imposer sur les ventes des produits d'une concession minière n'excèderait pas cinq pour cent ;

Et considérant qu'à l'époque où a été passé l'arrêté en conseil du 20 de février 1901, le droit régalien sur l'or extrait en vertu des dispositions des règlements concernant les mines alluviales dans le territoire du Yukon était de dix pour cent du rendement brut, et depuis a été réduit à deux et demi pour cent sur la valeur de l'or exporté, mais aucun changement n'a été fait dans le droit régalien prélevé en vertu des dispositions des règlements concernant les mines quartzeuses,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon*, tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, que l'article 53*a* des susdits règlements concernant les mines quartzeuses soit et il est par le présent rescindé, et remplacé par le suivant:—

"La patente pour une concession minière réservera à la Couronne pour toujours le même droit régalien sur les produits de la concession qui est établi ou qui sera plus tard établi dans les règlements concernant les mines alluviales. Au Manitoba et dans les territoires du Nord-Ouest et dans les districts provisoires d'Ungava, Kéwatin, Mackenzie et Franklin la patente d'une concession minière réservera à la Couronne pour toujours un droit régalien n'excédant pas deux et demi pour cent des ventes des produits de la concession, le droit régalien sera prélevé de la manière que prescrira le ministre de l'Intérieur. Le même droit régalien sera prélevé sur les ventes qui pourront être faites avant l'émission de la patente."

Greffier du Conseil privé.

HOTEL DU GOUVERNEMENT A OTTAWA.

Jeudi, le 26e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par l'article 4 des règlements concernant les mines quartzeuses établis par arrêté en conseil du 21 de mars 1898, il est décrété qu'un certificat de mineur libre peut être accordé pour un an ou plus mais n'excédant pas cinq, moyennant le paiement des honoraires énoncés dans le tarif des honoraires annexé aux dits règlements ; et par le tarif mentionné dans les susdits règlements l'honoraire exigé pour un certificat de mineur libre délivré en faveur d'un individu sera de $10.00 ; et

Considérant que l'honoraire pour ce certificat de mineur libre acquis en vertu des dispositions concernant les mines alluviales dans le territoire du Yukon a été réduit à $7.50 par un arrêté en conseil daté le 31 de mars 1903,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon* tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, et il est par le présent ordonné que le tarif annexé aux règlements des mines quartzeuses établis par arrêté en conseil au 21 de mars 1898, soit modifié en retranchant l'honoraire de $10 qui y est stipulé pour un certificat de mineur libre, et y substituant $7.50.

JOHN J. McGEE,
Greffier du Conseil privé.

BY-LAW No. "B" of The Manitoulin and North Shore Railway Company to fix and regulate the tolls to be demanded and taken for the transportation of passengers upon the railway, and to regulate the conduct of passengers and persons using the property of the company, and for other purposes.

Whereas it is expedient and necessary, in pursuance of The Railway Act of the Parliament of Canada, and the Acts respecting the incorporation of The Manitoulin and North Shore Railway Company, that a by-law be passed, fixing and regulating the tolls to be demanded and taken for the transportation of passengers upon the railway, and for other purposes :

Therefore it is hereby enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

Passenger tolls and conditions of carriage.

1. The maximum rate for the conveyance of passengers upon the company's lines of railway, and upon its branches, and upon leased lines operated by the company, shall be four cents per mile, excepting between points on Manitoulin Island where the rate shall be three and a third cents per mile ; fares will be computed according to the mileage between stations, adding one mile instead of any fraction less than a mile, and also adding a sufficient number of cents to make the fare end in 0 or 5 ; but tickets may at any time be sold at a lower rate, provided that the same rates are under the same circumstances charged equally to all persons.

2. Officers and agents for the sale of tickets are provided, at each of the company's stations (except flag stations) and elsewhere. At chief stations the ticket office will be open at least twenty minutes, and at smaller stations ten minutes, before the departure of each train. All passengers travelling upon the company's lines are required to provide themselves with tickets before entering the train.

3. Passengers holding reduced fare certificates, entitling them to purchase tickets at less than the regular fare (under certain conditions which form part of contract and are endorsed on certificate) must present such certificate at the regular ticket office of the company at least ten minutes prior to the time the train is due to leave, in order to procure tickets at the reduced fare.

4. Delegates to conventions, conferences, and meetings of societies travelling on certificates as issued under the "Convention Plan", in order to obtain the reduced fare for the return journey, must present their certificates properly signed by the Secretary of the Convention at the regular ticket office of the company, at the point at which convention is held, at least ten minutes prior to the time the train is due to leave.

5. Passengers travelling on reduced fare tickets, issued on authority of reduced fare certificates, and so endorsed, must present such certificates to conductor with railway ticket when called upon to do so.

6. In the case of passengers taking the train at points where tickets are sold, the sum of ten cents over and above the regular fare will be charged for each ticket purchased from the conducter on any of the trains of the company, but it shall be the duty of such conductor to give to every person when purchasing such ticket a rebate check, and, on presentation of such rebate check at any ticket office of the company within thirty days from the date of issue, the said ten cents will be refunded.

7. Any ticket issued, limited by reasonable conditions as to the time within which it is to be used, or as to the train or class of car for which it is available, will not be accepted after the expiration of the time limited by the condition, nor for a different class of car, nor for a different train, but the holder of such ticket will be required to pay the usual fare in full, or present a ticket, good for the time, train, and car, and if he do not do so, shall be considered to be a person refusing to pay his fare within the meaning of this by-law and section 248 of The Railway Act.

8. Nothing herein contained shall affect the right of any person to recover a refund for any such ticket under the Act respecting the sale of Railway Passenger Tickets.

9. Any person without a ticket, or refusing upon request to produce the same, and refusing to pay fare, may be removed from the train with his baggage at any usual stopping place, or near any dwelling house, as the conductor may elect, the conductor first stopping the train and using no unnecessary force.

10. Whenever and so often as the conductor for the time being of any train requests any passenger to produce his or her ticket, such passenger shall comply with the request, or, in default thereof, shall be liable to pay, and shall forthwith pay, the regular fare from the place where such passenger got on the train to the end of his or her journey.

11. Persons intoxicated or otherwise unable to take care of themselves will not be furnished with tickets or allowed to enter the cars or premises of the company.

12. Passengers and all other persons using the property of the company are required to conduct themselves with propriety, and to obey the reasonable requests of the station-master, conductor, or other officer of the company, with a view to promote the general comfort and convenience, and to maintain order and decorum.

13. Passengers are not entitled to occupy more than one sitting in a passenger car for each ticket, nor to fill up the seats with valises or hand baggage, so as to exclude other passengers.

14. Any person in or upon a carriage, station, platform of the company, or elsewhere upon the company's premises, in a state of intoxication, or fighting, or guilty of other disorderly conduct, or using foul, obscene, or abusive language, or otherwise wilfully interfering with the comfort of other passengers, is guilty of an offence under this by-law. In addition to the liability to fine under this section, any such person may be summarily ejected from such station or premises of the company, or, in the case of a moving train, such person may be removed or ejected from the train, at any usual stopping place or near a dwelling house, and the conductor and train servants may use force, doing no unnecessary violence, to restrain passengers and others upon the train from fighting, using foul, obscene, or abusive language, or other disorderly conduct.

15. No person will be allowed to travel without a ticket or pass signed by an authorized officer.

16. No person shall sell beer, wine, spirits or intoxicating liquor of any kind upon any train, car, station, or premises of the company, except persons duly authorized ; and no person will be allowed to sell any papers, cigars, candy, fruit or any other goods, or merchandise, upon any of the trains or premises of the company, except the duly authorized agents of the company appointed for that purpose.

17. Smoking in cars, except those specially set apart for that purpose, or in the station or general waiting rooms, other than rooms specially set apart as smoking rooms, is forbidden.

18. The waiting rooms are provided for the use of the travelling public only. All other persons may be excluded from them by the servants of the company, and no person shall obstruct or molest any passenger or passengers while entering or quitting a station or car.

19. Beggars, pedlers, or itinerant musicians will not be allowed to practise their vocation upon the train, or in or upon the stations, platforms, or other premises of the company.

20. Gambling, or the playing of any game of cards, or of chance, for money, will not be permitted on any train or premises of the company, and any person or persons who refuse to comply with the request of the conductor or agent to cease playing such games or gambling will be liable to be removed from the train at any usual stopping place, or near any dwelling house, or from the station or premises of the company, as the case my be.

21. Any person writing obscene or offensive words on any part of the company's station or cars, or committing any nuisance upon the property of the company, and any person who wilfully cuts or tears any lining, or window strap, or curtain, or removes or defaces any plate or metal, or breaks or scratches any window or other glass in any station or car of the company, or who otherwise, except by unavoidable accident, damages, defaces, or injures any such car or any station or other property of the company, is guilty of an offence under this By-law.

22. No person shall get into or upon, or get off the steps or platform of any car after the train has been put in motion, or until it stops.

23. No person injured while on the platform of any car, or on any baggage, wood, or freight car, in violation of the printed regulations posted up at the time, shall have any claim in respect to the injury, if room inside of such passenger cars, sufficient for the proper accommodation of the passengers, was furnished at the time.

24. The company may refuse to carry any person who has any infectious disorder. Any person who has any such disorder and is found upon the premises of the company, or who travels or attempts to travel on the railway of the company, is guilty of an offense under this by-law.

25. Any person who has charge of any person suffering from an infectious disorder, while upon the premises of the company, or travelling or attempting to travel on the railway, or who aids or assists in bringing or placing on the premises or cars of the company any person suffering from such disorder, is guilty of an offence under this by-law.

26. Coachmen, hackmen, carters, porters, and runners for railways, boats, stage-lines, and hotels shall not solicit custom upon any of the company's trains, nor enter the stations, or come upon the platforms to solicit passengers, except by special authority of the company, but they shall stand in such places as may be appointed for that purpose by the station master, agent, or constable.

27. Private carriages, hacks, and baggage waggons, while waiting at the stations, may be required to stand in such place or places as may be directed by the station-master, agent, or constable, and all persons in charge of such vehicles must submit to the directions and regulations of the station-master, agent, or constable in regard to the use of the premises of the company.

28. It is the duty of the company's officers and servants to enforce obedience to this by-lay, and any person committing an offence, prohibited or declared by this by-law, shall be liable to a penalty not exceeding $20 for each offence under any of the sections of this by-law, to be imposed upon conviction for such offence before a magistrate, as provided by section 296 of The Railway Act, and, in addition to the said penalty shall be liable to be summarily removed from the company's premises, or ejected from the company's train, as the case may be. And in case it becomes necessary to remove or eject any person from a moving train, such person may be put off with his baggage at any usual stopping place, or near a dwelling house; the conductor first stopping the train and using no unnecessary force.

29. Express messengers, mail-clerks, persons travelling in charge of live stock and other goods, travelling free or upon passes, will be carried at their own risk only, and will be required to execute a release exonerating the company from all liability from damages, whether the same be caused by the negligence of the officers or servants of the company or not.

Station Regulations.

30. The actual personal baggage of passengers, holding regular passage tickets, such as chests, trunks, valises, carpet and leather bags, and hat boxes, will be carried free; if the weight is not in excess of the amount allowed by this by-law. Merchandise, or household furniture, will not be checked or carried as baggage.

31. Baggage must be presented to the baggage-master at the station, at least ten minutes before the time fixed for the departure of the train, otherwise the company reserve the right to forward it by the next convenient train, for the station to which the baggage is checked.

32. The liability of the company for loss or damage to baggage is limited to personal baggage only, and to a sum not exceeding one hundred dollars for each passenger.

33. Passengers must procure tickets, and show them to the station agent or baggageman, before checking the baggage.

34. Passengers will not be allowed to take into the car with them large pieces of baggage, which are capable of being checked, or any parcel of goods or merchandise.

35. Parcels of merchandise must be sent by freight or express, and, if no express messenger be on the train, an extra baggage ticket may be issued upon payment of double extra baggage rates.

36. All baggage exceeding 150 pounds, for each passenger holding full ticket, and 75 pounds, for each passenger holding half-ticket, will be charged for as excess baggage, according to the tariff of rates in force from time to time, and the charges must be paid before the baggage is checked. Baggage in excess of above named amounts will be charged for at the rate of twenty per cent of the fare per hundred (100) pounds, but the minimum charge for such excess shall be twenty-five cents.

37. No single piece of baggage weighing over 200 pounds will be accepted for transportation in the baggage cars or checked for that purpose.

38. To avoid mistakes, all passengers must attend personally to the checking and marking of their baggage, and all baggage after being carried into the baggage car will be landed at the station designated, and must be claimed by the owner on arrival of the train.

39. Dogs will not be carried unless tickets are purchased for them. A chain and collar must be attached for securing them, and a satisfactory release from the owner or consigner upon the company's form must be made out and signed before tickets for dogs will be issued. The charge for each dog shall be the same as for 100 pounds excess baggage.

40. Bicycles or tricycles will not be conveyed as part of the free baggage allowed to each passenger, but may be charged for at the same rate as 50 pounds of excess baggage, under the Excess Baggage Tariff, with a minimum charge of twenty-five cents. They must be accompanied by passengers, presenting tickets for passage, and marked with the owners name and address, and will not be taken with excursion trains unless baggage cars are attached.

41. Baggage will not be given out until the duplicate check is produced.

42. The company will not be liable for any baggage not checked.

43. On all baggage not claimed on its arrival, storage will be charged at the following rates, after twenty-four hours, viz.:—For the first day or fraction of a day thereafter, twenty-five cents for each piece or package, and for each day or fraction of a day after the first day, ten cents for each piece or package.

44. Cabmen and porters with checks will be admitted to the platforms and baggage rooms to obtain baggage; they will also be admitted when taking baggage to the trains, but they must comply with the directions or regulations of the station-master or agent, for the purpose of securing order and preventing noise or other annoyance to the public or to the company.

45. Runners, cabmen and carters, and others frequenting any of the stations, platforms, or premises of the company, are required to conduct themselves in an orderly manner. Fighting, scuffling, offensive, obscene or abusive language are forbidden, and any person acting in a disorderly manner, or using such language, is guilty of an offence under this section.

46. By-Law No. "C." of The Manitoulin and North Shore Railway Company, to fix and regulate tolls to be demanded and taken for transportation of goods, and the conditions of carriage.

Whereas it is expedient and necessary, in pursuance of the powers conferred upon the said company by The Railway Act of Canada, that a by-law be passed fixing and regulating the tolls to be demanded and taken for the transportation of goods, and the conditions of carriage,—

Therefore it is hereby enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

Freight tolls and charges.

1. The tariff of rates to be taken for freight rates and tolls on the lines of railway of the said company, or upon any branch or line of railway leased or operated by the said company, shall be according to the tariff set forth in the schedule hereunto annexed, called "Local Freight Mileage Tariff Number One."

2. The classes referred to in the said annexed tariff are those fixed by the Canadian Joint Freight Classification as the same shall be approved of from time to time by the Governor in Council ; but the company shall have the right to conform to any system of classification in use upon connecting roads in the United States in respect to through traffic to or from the United States.

3. The charges on all freight must be paid before delivery of the goods.

4. The said tariff shall be subject to the following rules and conditions of carriage of this company, and to such rules and conditions of the company as may hereinafter be from time to time enacted or adopted by the company, with the approval of the Governor in Council.

General conditions of carriage.

5. The company will not be responsible for any goods conveyed upon the railway unless the same be signed for as received by a duly authorized agent. The agent will only sign a receipt for goods upon receiving a declaration of shipping setting forth the description of the goods and the name and address of the consignee.

6. Agents are not authorized to receive bank notes, money, deeds, securities or other valuable papers, and the company will not be responsible for the loss of or damage to money, bills, promissory notes or securities, jewellery, trinkets, rings, precious stones, gold or silver manufactured or unmanufactured, gold or silver plate or plated articles, clocks, watches, time pieces, marble, lace, furs, silks in a manufactured or unmanufactured state, and whether wrought up or not wrought up with other materials ; writings, title deeds, prints, maps, paintings, engravings, pictures, stamps or other valuables ; nor for damage done to china, glass, eggs, wearing apparel, musical instruments, furniture, toys, castings, cast-iron, stoves, grindstones, tombstones, slate or other such hazardous or brittle article in packages or otherwise, whether delivered to be carried for hire or to accompany the person of any passenger on the railway.

7. The company will not be responsible for loss or damage occasioned by delay from storms or accidents or from the weather, fire, heat, frost, civil commotion, or unvoidable causes, or delay of any perishable articles. Fresh fish, meat, fruit, dressed hogs, poultry and all other perishable articles will be carried only at the owner's risk, and the freight charges must be prepaid.

8. The company will not carry any boiler, cylinder, piece of machinery, casting, stone or other articles of unusual bulk or weight, aquafortis, nitric acid, acetic acid, vitriol, friction matches or other dangerous articles, except under special contract or agreement.

9. Senders of dangerous articles will be held accountable for any damage arising therefrom, unless the nature of the contents is distinctly marked on the outside of the package containing the same, and unless notice in writing is also given to the station master or freight agent, that due care may be observed in loading and transporting it. The company will not be liable in any case for the loss of or damage to any such articles.

10. The company will carry gunpowder only on special agreement as to the rates of tolls and other conditions.

11. The company will not be responsible for the loss of or damage to any package or its contents insufficiently or improperly marked, packed, directed, or described, or containing articles liable to breakage, or, by breaking, to damage each other or other articles; or for any loss or damage to cases of boots, shoes, or to any case or package containing articles liable to peculation or fraudulent abstraction, unless such case or package is strapped with iron or wood or otherwise securely protected; or leakage of any kind.

12. The company will not be responsible for the loss of or damage to any goods put into returned wrappers or boxes or packages described as "empties", nor for any goods directed "to be left until called for", or "to order", or warehoused for the convenience of the parties to whom they belong, or by, or to whom they are consigned, nor for loss of or damage to goods that are not taken away immediately after advice of their arrival has been sent or posted.

13. The delivery of goods will be considered complete, and all responsibility will terminate when placed in the shed at the station to which they are consigned, and the warehousing of them will then be at the owner's risk and expense, except as to lumber, coal, bricks and goods of like bulk and description, and the delivery of which shall be complete, and all responsibility in connection with which shall terminate upon their being detached from the train whereby they have been drawn; and it shall be lawful to send any goods for which store or warehouse room cannot be conveniently supplied at the station to the warehouse of any wharfinger or storehouseman that may be available, at the risk and expense of the owners of property so stored, and the charge of warehousing and conveyance shall form an additional lien upon such goods.

14. The company will not be responsible for any injury to grain by heating, nor for any deficiency in weight or measure of grain, &c., in bags or in bulk; nor for any deficiency in weight, number or measure of lumber, ore, coal, iron or other mineral carried by the car-load; nor for shrinkage or short weight or short measure of goods of any kind unless damage to the package can be shown to have happened whilst in the possession of the company.

15. The company shall have a lien on all goods transported over its lines for freight and charges thereon, as well as for any balance previously due for freight or otherwise by the owner or consignee; and the said goods shall be liable to be sold by public auction or by private sale for the payment of the charges thereon and other balances due, and if the tolls are not paid within six weeks the company may sell the whole or any part of such goods. Should the said goods be of a perishable nature, same may be sold after giving the consignee or his agent one day's notice.

16. In respect of all goods addressed to consignees at points beyond places at which the company has stations, and respecting which goods no directions to the contrary have been received at these stations the company reserves the right to forward such goods to their destination by public carrier or otherwise as opportunity may afford, or to allow them to remain upon the railway premises or to send them to any public or private warehouse pending communication with the consignee at the risk of the owners. The company will not be responsible for any delay to such goods. The delivery of the goods by the company will be considered as complete, and the responsibility of the company will be considered to have ceased, when notice shall have been sent to some public carrier that such goods are at the station awaiting further conveyance. And the company will not be responsible for any loss of or any damage or detention that may happen to goods so sent to them, if such loss or damage or detention occur after the said notice, or beyond the limits of the railway. If the goods are allowed to remain on the railway premises or are sent to any public or private warehouse, they shall be at the risk of the owners for any damage arising from any cause whatever.

17. It is expressly agreed that the company does not contract for the safety, carriage, or delivery of any goods except on the company's lines, and where a through rate is named to a point reached by other carriers, either by land or by water, it is on the agreement that this company is to act only as agent of the owner of the goods as to that portion of the said rate required to meet the charges of other carriers; and if any goods be consigned to a point beyond the company's lines, that the goods may be handed over by the company for further conveyance to such carrier as the company may select, and the company, in so handing over the goods, shall be merely the agent of the owner, and the responsibility of the company in respect of any loss, misdelivery, detention, damage or injury by means whatsoever to any goods, shall cease so soon as the company shall either deliver them to the connecting carrier for further conveyance, or notify such carrier that it is ready to do so.

18. All freight to or from places beyond the company's lines shipped, or to be shipped, by water, shall, while not on the company's lines, or in its sheds or warehouses be entirely at the owner's risk.

19. All articles directed to be left at any way or flag station or platform where the company has no building for the storage of freight, or where there is no resident agent, must be prepaid, and will be at the risk of the owner whenever they are landed at such station or platform; and all articles brought there for conveyance will also be at the owner's risk until taken into the cars. Shippers sending goods to be left at such way or flag station or platform will be required to sign a release.

20. The time allowed by the company for the purpose of loading or unloading cars is 48 hours, exclusive of Sundays; after the expiration of that time, demurrage at the rate of $2 per car per day will be charged. This applies as well to cars that are not promptly loaded after being placed in position as to cars that are not unloaded after arrival. Cars which are required to be unloaded by consignee or owner may be discharged by the company at the consignee's or owner's expense. Any charge under this section shall be added to the freight charges, and the company shall have a lien therefor.

21. No claim for loss or damage will be allowed unless notice in writing is given to the station agent before the packages are removed.

22. Claims for loss or damage shall be computed on the value of property at time and place of shipment.

23. The company will not, under any circumstances, be liable for loss of market or other claim arising from delay or detention of any train or trains whether in starting or in any of the way stations or in the course of the journey. It does not undertake to send goods by any particular train or to connect with any particular train or ship of connecting carriers.

24. Rates and weights entered on receipts or shipping bills by shippers are not binding upon the company. Property that cannot be readily counted, weighed, or measured, will only be received as more or less, or shippers weight and count.

25. Goods going to or from any place out of Canada are subject to customs charges and regulations, and the company will not be responsible for any loss or damage arising from detention, inspection, or handling.

(*c*) Those composed of lads who, with the permission of their parents and guardians, prefer to join an organization, unconnected with any educational establishment.

2. Cadets must not be more than 18 years of age.

3. The application for authority to form a cadet organization must be made on cadet form A. If it is for an organization in class (*a*) it must be signed by the principal or head master of the college, or the school with which the organization is to be connected, and must be accompanied by the written sanction of the minister or other official head of the department of education of the province in which the organization is to be;

If it is for an organization in class (*b*), it must be signed as for class (*a*), and must be accompanied by the written sanction of the chairman or other of the trustees or board of management of the college, or school with which it is to be connected; and,

If it is for an organization in class (*c*), it must be signed by a responsible person vouched for by the municipal head of the city, town, township or parish, in which the organization is to be; and that municipal head must, in such case, recommend the application.

4. The application having been signed and sanctioned as prescribed in paragraph 3, must be transmitted to the officer commanding the military district in which the organization is to be. That officer will make due inquiry into all the details set out in the application, and will forward the document to head-quarters with his recommendation or otherwise.

5. In making his inquiry and report the district officer commanding must specially give his attention to the following points:—

(1) Is the proposed organization likely to be successful and to be a credit to the cadet service of Canada?

(2) Are the proposed arrangements for the storage and safe keeping of arms and equipment suitable for the purpose?

(3) Is the proposed instructor competent?

(4) Is the proposed uniform suitable, having regard to correct military ideas and to circumstances of the cadets?

No foreign uniform or any imitation thereof will be allowed.

(5) And where the application is for an organization in class (*c*), the officer must report also as to the responsibility of the applicant for the safe keeping, care, and return in good order of such arms, equipment, and other stores as may be loaned to him by the militia department.

6. Authority for the formation of a cadet organization will be given by the Minister of Militia and Defence, on the recommendation of the General Officer Commanding.

7. A cadet organization may at any time be disbanded, for cause or otherwise, and the arms and equipment loaned for its use may be called in, by order of the Minister of Militia and Defence, on the recommendation of the General Officer Commanding.

OFFICERS.

8. The officers of cadet organizations will be designated cadet 2nd lieutenants, cadet lieutenants, cadet captains, cadet majors. Establishments for cadet organizations will be laid down in militia orders from time to time.

ARMS.

9. As far as it may be possible to do so, arms and equipment will be loaned by the militia department for the use of cadet organizations.

10. As soon as possible after the cadet organization has been authorized, a requisition (cadet form C) for the prescribed arms and equipment necessary for its training should be filled out and signed by the official or person on whose application the organization was authorized, and must be transmitted to the ordnance officer of the district in which the organization is.

11. Ammunition will be supplied to cadet organizations on repayment from militia stores at the same price as to the militia.

INSTRUCTION.

12. No allowance to a cadet organization for drill instruction or for any other purpose can be made from the public funds; but instructors will be detailed from the permanent force whenever it is possible to do so.

13. A cadet instructor, duly authorized by the General Officer Commanding—whenever he is or is not on the regular instructional staff of the college or school with which his cadet organization is connected—will, on the recommendation of the district officer commanding, be permitted to attend any of the schools of infantry, or the Canadian School of Musketry, or both, for the purpose of obtaining qualifying certificates, and then will be entitled to the same transport and allowances as are given to militia officers for the like purpose.

14. During his attendance at a military school a cadet instructor will be considered a probationer, and will be expected to conform to the regulations laid down for the conduct of the school, and to the orders issued by its commandant; and he may then wear the dress of the cadet organization with which he is connected, or the militia service dress without badges of rank, or, if he belongs to a militia corps, the uniform of that corps.

15. After a cadet instructor has obtained the prescribed qualification in drill and musketry, he will be granted the rank of 2nd lieutenant in the militia, and will be permitted to retain militia rank so long as he remains instructor, and so long as the cadet organization with which he is connected continues efficient. After three years service as such instructor he may be promoted to the rank of lieutenant; and the time during which he holds militia rank shall be allowed to count as qualifying service for the Colonial Auxiliary Forces Officers' Decoration, and for the Colonial Auxiliary Forces Long Service Medal.

16. Cadet instructors, no matter what their rank in the militia, will always be senior on parade to cadet officers.

17. By order of the General Officer Commanding, a cadet instructor may at any time be removed from his position as instructor.

18. The system of drill and instruction to be given to cadet organizations shall be such as may from time to time be prescribed in militia orders.

19. Cadet organizations, their arms and equipment, shall be subject to such inspections as may from time to time be directed in militia orders.

20. The authorization of a cadet organization, and its disbandment, and the appointment and removal of its officers and instructors will be published in militia orders as occasion arises.

21. Copies of these regulations, and blank forms of application, roll, etc., may be obtained from district officers commanding.

ARRÊTÉS EN CONSEIL.

[Renv. 454,691]

HOTEL DU GOUVERNEMENT À OTTAWA.

Samedi, le 28e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 20 de février 1901, l'article 53*a* des règlements concernant les mines quartzeuses ont été modifiés en décrétant que le droit régalien à imposer sur les ventes des produits d'une concession minière n'excèderait pas cinq pour cent ;

Et considérant qu'à l'époque où a été passé l'arrêté en conseil du 20 de février 1901, le droit régalien sur l'or extrait en vertu des dispositions des règlements concernant les mines alluviales dans le territoire du Yukon était de dix pour cent du rendement brut, et depuis a été réduit à deux et demi pour cent sur la valeur de l'or exporté, mais aucun changement n'a été fait dans le droit régalien prélevé en vertu des dispositions des règlements concernant les mines quartzeuses,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon*, tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, que l'article 53*a* des susdits règlements concernant les mines quartzeuses soit et il est par le présent rescindé, et remplacé par le suivant:—

" La patente pour une concession minière réservera à la Couronne pour toujours le même droit régalien sur les produits de la concession qui est établi ou qui sera plus tard établi dans les règlements concernant les mines alluviales. Au Manitoba et dans les territoires du Nord-Ouest et dans les districts provisoires d'Ungava, Kéwatin, Mackenzie et Franklin la patente d'une concession minière réservera à la Couronne pour toujours un droit régalien n'excédant pas deux et demi pour cent des ventes des produits de la concession, le droit régalien sera prélevé de la manière que prescrira le ministre de l'Intérieur. Le même droit régalien sera prélevé sur les ventes qui pourront être faites avant l'émission de la patente."

Greffier du Conseil privé.

HOTEL DU GOUVERNEMENT À OTTAWA.

Jeudi, le 26e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par l'article 4 des règlements concernant les mines quartzeuses établis par arrêté en conseil du 21 de mars 1898, il est décrété qu'un certificat de mineur libre peut être accordé pour un an ou plus mais n'excédant pas cinq, moyennant le paiement des honoraires énoncés dans le tarif des honoraires annexé aux dits règlements ; et par le tarif mentionné dans les susdits règlements l'honoraire exigé pour un certificat de mineur libre délivré en faveur d'un individu sera de $10.00 ; et

Considérant que l'honoraire pour ce certificat de mineur libre acquis en vertu des dispositions concernant les mines alluviales dans le territoire du Yukon a été réduit à $7.50 par un arrêté en conseil daté le 31 de mars 1903,—

A ces causes, il plaît au Gouverneur général en conseil, en vertu de l'article 47 de l'*Acte des terres fédérales*, tel qu'édicté par l'article 5 du chapitre 15 de 55–56 Victoria, et l'article 8 de l'*Acte du territoire du Yukon* tel qu'édicté par l'article 3 du chapitre 34 de 2 Edouard VII, d'ordonner, et il est par le présent ordonné que le tarif annexé aux règlements des mines quartzeuses établis par arrêté en conseil au 21 de mars 1898, soit modifié en retranchant l'honoraire de $10 qui y est stipulé pour un certificat de mineur libre, et y substituant $7.50.

*ORGANISATIONS D'ÉLÈVES.

Formation et gouverne.

FORMATION.

Les organisations d'élèves seront de trois catégories :—

(*a*) Celles composées d'élèves fréquentant des collèges et écoles contrôlés par le gouvernement de la province dans laquelle ils sont situés ;

(*b*) Celles composées d'élèves fréquentant des collèges et écoles n'étant pas sous le contrôle d'un gouvernement, et

(*c*) Celles composées de jeunes garçons, qui, avec la permission de leurs parents et tuteurs, préfèrent joindre une organisation séparée d'une maison d'éducation.

2. Les élèves ne devront pas être âgés de plus de 18 ans.

3. L'autorisation de former une organisation d'élèves devra être demandée sur la formule Cadet Form A. Si la demande concerne une organisation dans la classe (*a*) elle devra être signée par le principal ou proviseur du collège ou de l'école auquel l'organisation sera attachée, et devra être accompagnée de l'assentiment écrit du ministre ou autre chef officiel du ministère de l'Education de la province dans laquelle sera l'organisation ;

Si c'est pour une organisation dans la classe (*b*) elle devra être signée comme pour la classe (*a*), et devra être accompagnée de l'assentiment écrit du président ou autre membre des syndics ou du conseil de régie du collège ou école auquel elle sera attachée ; et

Si c'est pour une organisation dans la classe (*c*), elle devra être signée par une personne responsable approuvée par le chef municipal de la cité, ville, township ou paroisse dans lequel sera l'organisation ; et ce chef municipal devra, dans ce cas, appuyer la demande.

4. La demande ayant été signée et sanctionnée tel que le prescrit le paragraphe 3, devra être transmise à l'officier commandant le district militaire dans lequel sera l'organisation. Cet officier s'enquerra soigneusement de tous les détails énoncés dans la demande, et transmettra le document ou quartier général avec sa recommandation ou autrement.

5. En faisant son enquête et son rapport l'officier commandant du district devra surtout porter son attention aux points suivants .—

(1) Est-il probable que l'organisation projetée réussisse, et fasse honneur au Service des Élèves du Canada?

(2) Les arrangements proposés pour l'emmagasinage et la garde en sûreté des armes et équipement sont-ils suffisants ?

(3) L'instructeur proposé est-il compétent ?

(4) L'uniforme proposé est-il convenable, eu égard aux idées militaires et aux circonstances des élèves ?

Aucun uniforme ou imitation d'uniforme étranger ne sera accepté.

(5) Et si la demande est pour une organisation dans la classe (*c*), l'officier devra aussi faire rapport sur la responsabilité du postulant pour la garde, le soin, et le retour en bon état des armes, équipement et autres effets qui lui seront prêtés par le ministère de la Milice.

6. L'autorisation de former une organisation d'élèves sera donnée par le ministère de la Milice et de la Défense, sur la recommandation de l'officier général commandant.

7. Une organisation d'élèves pourra, en tout temps, être licenciée à volonté, et les armes et équipement prêtés pour son usage pourront être rappelés, par ordre du ministre de la Milice et de la Defense, sur la recommandation de l'officier général commandant.

OFFICIERS.

8. Les officiers des organisations d'élèves seront désignés élèves 2nds lieutenants, élèves lieutenants, élèves capitaines et élèves majors. Les effectifs des organisations d'élèves seront publiés dans les Ordres de Milice de temps à autre.

ARMES.

9. En tant que possible, les armes et équipement seront prêtés par le ministère de la Milice pour l'usage des organisations d'élèves.

10. Aussitôt que possible après qu'une organisation d'élèves aura été autorisée, une réquisition (Cadet Form C) pour les armes et équipement nécessaires à son entraînement devra être remplie et signée par le fonctionnaire ou personne sur la demande duquel l'organisation a été autorisée, et devra être transmise à l'officier des magasins du district dans lequel se trouve l'organisation.

11. Des munitions seront fournies aux organisations d'élèves contre remboursement aux magasins militaires, aux mêmes prix qu'à la milice.

INSTRUCTION.

12. Aucune allocation pour instruction d'exercices ou pour d'autres fins ne peut être faite à même les fonds publics ; mais des instructeurs seront détachés des troupes permanentes chaque fois que la chose sera possible.

13. Un instructeur des élèves, dûment autorisé par l'officier général commandant—qu'il fasse ou non partie du personnel enseignant du collège ou école auquel l'organisation d'élèves est attachée—pourra, sur la recommandation de l'officier commandant du district, suivre une des écoles d'infanterie ou l'école canadienne de mousqueterie ou les deux, dans le but d'obtenir un certificat d'aptitudes, et alors il aura droit aux mêmes transport et allocations que ceux accordés aux officiers de la milice dans le même cas.

14. Durant son assistance à une école militaire un instructeur des élèves sera considéré comme stagiaire, et sera censé se conformer aux règlements établis pour la conduite de l'école, et aux ordres émis par son commandant ; et il pourra porter l'uniforme de l'organisation d'élèves à laquelle il est attaché, ou la tenue de service de la milice sans insignes de grade, ou, s'il appartient à un corps de milice, l'uniforme de ce corps.

15. Après qu'un instructeur d'élèves a acquis les qualités voulues en exercices militaires et mousqueterie, il recevra le grade de 2nd lieutenant dans la milice, et pourra retenir ce grade dans la milice tant qu'il restera instructeur, et aussi longtemps que l'organisation d'élèves à laquelle il est attaché continuera d'être effective. Après trois ans de service comme tel instructeur il pourra être promu au grade de lieutenant ; et le temps durant lequel il tient un grade dans la milice pourra compter comme service méritoire pour la décoration des officiers des troupes auxiliaires coloniales et pour la médaille de long service dans les troupes auxiliaires coloniales.

16. Les instructeurs d'élèves, quel que soit leur grade dans la Milice, auront toujours le pas sur les officiers d'élèves en revue.

17. Par ordre de l'officier général commandant, un instructeur des élèves pourra en tout temps être relevé de sa position d'instructeur.

18. Le système d'exercices et d'instruction donnés aux organisations d'élèves sera tel que prescrit de temps à autre dans les Ordres de Milice.

19. Les organisations d'élèves, leurs armes et équipement, seront soumis aux inspections qui seront de temps à autres prescrites dans les Ordres de Milice.

20. L'autorisation d'une organisation d'élèves, et son licenciement, et la nomination et renvoi de ses officiers instructeurs seront publiés dans les Ordres de Milice selon l'occasion.

21. On peut obtenir des copies des présents règlements, et des formules de demande, rôle, etc., des officiers commandants de district.

22. Tous règlements et ordres antérieurs qui concernent les corps d'élèves ou leur organisation, et tout ce qui concerne les associations d'exercices attachées aux écoles ou collèges, sont par le présent cancellés.

ORDERS IN COUNCIL.

[Ref. 454,917]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 7th day of December, 1903.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 26th February, 1903, from the Minister of the Interior, stating that in March, 1900, hydraulic mining lease No. 10 was issued in favour of Mr. Joseph W. Boyle of a tract of land extending for three and one-third miles along the west side of Quartz Creek, a tributary of the Indian River, in the Yukon Territory, which has since been assigned to the Quartz Creek (Yukon) Syndicate Limited, and the lessees right to water on this location, or to the diversion of water in connection with their operations thereon were made subject to the Regulations approved by the Governor General in Council on the 3rd of August, 1898.

The Minister further states that the lessees have now applied for permission to divert 1,000 miners' inches of water from Ruby Creek, a tributary of the Indian River on its left limit, for the operation of their location, also the right to take water, subject to the rights of placer miners, from such creeks or tributaries as may be crossed by the ditch or ditches constructed by them in connection with the grant which may be made to them.

This application was referred to the Honourable J. H. Ross, the Commissioner of the Territory for a report, and in reply he stated that the water from any creek or tributary crossed by a ditch should be applied for and granted as an original application in each case; that before any portion of the water to be diverted is sold or disposed of by the grantees they should show conclusively that such water is for the use of the miners along the line of the ditch, and not for the benefit of any person or company who may have the right to sell water, and thereby control the supply; that he is not aware of any objection to the applicants being permitted to divert water from Ruby Creek and the tributaries thereof which may be crossed by the ditch, also from Indian River, provided they do not in any way obstruct the latter stream or interfere with any operations which may be carried on thereon; but that no water from creeks or tributaries entering the Indian River on its right limit along the line of the ditch or ditches should be granted to the applicants.

The Minister observes that the Regulations established by the Governor General in Council on the 3rd August, 1898, above referred to, provide that the Mining Recorder may, upon application, grant the right to divert water from any stream or lake in the Yukon Territory, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water, but by Order in Council dated the 7th of December, 1901, the provision made in these Regulations that the owner of a ditch or water privilege might sell or dispose of the water granted was rescinded.

The Minister in accordance with the report made by Mr. Ross, the former Commissioner of the Yukon Territory, recommends that the above Syndicate be granted the right to divert the quantity of water applied for from Ruby Creek, in accordance with the provisions of the Regulations approved by the Order in Council dated the 3rd of August, 1898, and the amendments thereto, also the right to apply to the Gold Commissioner for such grants as he deems proper to enable the Syndicate to divert water from the Indian River and from the creeks and tributaries on the left limit thereof, which may be crossed by the ditch or ditches constructed in connection with the grant which may be made to them, the works for the diversion of water to be constructed to the satisfaction of the Government Mining Engineer.

The Minister, also recommends that the Commissioner of the Yukon Territory may, under special circumstances, and upon such terms and conditions as may be approved by the Yukon Council, permit the grantees to dispose of a portion of the water which they may divert from Ruby Creek, and also a portion of the water which they may acquire under separate grants made in accordance with the provisions of the Regulations, from the creeks and tributaries which may be crossed by the ditch or ditches constructed by them, upon proof to the satisfaction of the Commissioner being furnished that such water is for the use of the miners along the line of the ditch or ditches, and not for the benefit of any person or company who may have the right to sell water.

The Committee submit the same for approval.

JOHN J. McGEE,
31-4 Clerk of the Privy Council.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 19th day of January, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Memorandum dated 4th January, 1904, from the Minister of Marine and Fisheries submitting with reference to chapter 48 of the Legislation of 1903, by which on and after the first day of January, one thousand nine hundred and four, the River Saguenay was detached from the pilotage district within the port of Quebec, that the effect of the legislation referred to, was to detach the River Saguenay from the control of the pilotage authorities for the pilotage district below Quebec, and place it within the jurisdiction of The General Pilotage Act, chapter 80 of the Revised Statutes of Canada.

The Minister therefore recommends that a pilotage district be established to be known as the pilotage district for the River Saguenay, the limits thereof to be as follows:

"To embrace all the tidal waters of the River " Saguenay and its tributaries, and the waters of the " River St. Lawrence at its mouth within a radius of " seven miles from the front range lighthouse at " Pointe Noire, on the western side of the mouth of " the river."

Pilotage to be compulsory.

The Minister further recommends that Messrs. C. P. Charlton, of St. Catherines' Bay, Saguenay; J. E. A. Dubuc, Chicoutimi, and Captain William Blackburn, of Chicoutimi, be appointed Commissioners for the pilotage district above.

The Committee submit the same for approval.

BY-LAW No. "B" of The Manitoulin and North Shore Railway Company to fix and regulate the tolls to be demanded and taken for the transportation of passengers upon the railway, and to regulate the conduct of passengers and persons using the property of the company, and for other purposes.

Whereas it is expedient and necessary, in pursuance of The Railway Act of the Parliament of Canada, and the Acts respecting the incorporation of The Manitoulin and North Shore Railway Company, that a by-law be passed, fixing and regulating the tolls to be demanded and taken for the transportation of passengers upon the railway, and for other purposes :

Therefore it is hereby enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

Passenger tolls and conditions of carriage.

1. The maximum rate for the conveyance of passengers upon the company's lines of railway, and upon its branches, and upon leased lines operated by the company, shall be four cents per mile, excepting between points on Manitoulin Island where the rate shall be three and a third cents per mile ; fares will be computed according to the mileage between stations, adding one mile instead of any fraction less than a mile, and also adding a sufficient number of cents to make the fare end in 0 or 5 ; but tickets may at any time be sold at a lower rate, provided that the same rates are under the same circumstances charged equally to all persons.

2. Officers and agents for the sale of tickets are provided, at each of the company's stations (except flag stations) and elsewhere. At chief stations the ticket office will be open at least twenty minutes, and at smaller stations ten minutes, before the departure of each train. All passengers travelling upon the company's lines are required to provide themselves with tickets before entering the train.

3. Passengers holding reduced fare certificates, entitling them to purchase tickets at less than the regular fare (under certain conditions which form part of contract and are endorsed on certificate) must present such certificate at the regular ticket office of the company at least ten minutes prior to the time the train is due to leave, in order to procure tickets at the reduced fare.

4. Delegates to conventions, conferences, and meetings of societies travelling on certificates as issued under the "Convention Plan", in order to obtain the reduced fare for the return journey, must present their certificates properly signed by the Secretary of the Convention at the regular ticket office of the company, at the point at which convention is held, at least ten minutes prior to the time the train is due to leave.

5. Passengers travelling on reduced fare tickets, issued on authority of reduced fare certificates, and so endorsed, must present such certificates to conductor with railway ticket when called upon to do so.

6. In the case of passengers taking the train at points where tickets are sold, the sum of ten cents over and above the regular fare will be charged for each ticket purchased from the conducter on any of the trains of the company, but it shall be the duty of

such conductor to give to every person when purchasing such ticket a rebate check, and, on presentation of such rebate check at any ticket office of the company within thirty days from the date of issue, the said ten cents will be refunded.

7. Any ticket issued, limited by reasonable conditions as to the time within which it is to be used, or as to the train or class of car for which it is available, will not be accepted after the expiration of the time limited by the condition, nor for a different class of car, nor for a different train, but the holder of such ticket will be required to pay the usual fare in full, or present a ticket, good for the time, train, and car, and if he do not do so, shall be considered to be a person refusing to pay his fare within the meaning of this by-law and section 248 of The Railway Act.

8. Nothing herein contained shall affect the right of any person to recover a refund for any such ticket under the Act respecting the sale of Railway Passenger Tickets.

9. Any person without a ticket, or refusing upon request to produce the same, and refusing to pay fare, may be removed from the train with his baggage at any usual stopping place, or near any dwelling house, as the conductor may elect, the conductor first stopping the train and using no unnecessary force.

10. Whenever and so often as the conductor for the time being of any train requests any passenger to produce his or her ticket, such passenger shall comply with the request, or, in default thereof, shall be liable to pay, and shall forthwith pay, the regular fare from the place where such passenger got on the train to the end of his or her journey.

11. Persons intoxicated or otherwise unable to take care of themselves will not be furnished with tickets or allowed to enter the cars or premises of the company.

12. Passengers and all other persons using the property of the company are required to conduct themselves with propriety, and to obey the reasonable requests of the station-master, conductor, or other officer of the company, with a view to promote the general comfort and convenience, and to maintain order and decorum.

13. Passengers are not entitled to occupy more than one sitting in a passenger car for each ticket, nor to fill up the seats with valises or hand baggage, so as to exclude other passengers.

14. Any person in or upon a carriage, station, platform of the company, or elsewhere upon the company's premises, in a state of intoxication, or fighting, or guilty of other disorderly conduct, or using foul, obscene, or abusive language, or otherwise wilfully interfering with the comfort of other passengers, is guilty of an offence under this by-law. In addition to the liability to fine under this section, any such person may be summarily ejected from such station or premises of the company, or, in the case of a moving train, such person may be removed or ejected from the train, at any usual stopping place or near a dwelling house, and the conductor and train servants may use force, doing no unnecessary violence, to restrain passengers and others upon the train from fighting, using foul, obscene, or abusive language, or other disorderly conduct.

15. No person will be allowed to travel without a ticket or pass signed by an authorized officer.

22. No person shall get into or upon, or get off the steps or platform of any car after the train has been put in motion, or until it stops.

23. No person injured while on the platform of any car, or on any baggage, wood, or freight car, in violation of the printed regulations posted up at the time, shall have any claim in respect to the injury, if room inside of such passenger cars, sufficient for the proper accommodation of the passengers, was furnished at the time.

24. The company may refuse to carry any person who has any infectious disorder. Any person who has any such disorder and is found upon the premises of the company, or who travels or attempts to travel on the railway of the company, is guilty of an offense under this by-law.

Freight tolls and charges.

1. The tariff of rates to be taken for freight rates and tolls on the lines of railway of the said company, or upon any branch or line of railway leased or operated by the said company, shall be according to the tariff set forth in the schedule hereunto annexed, called "Local Freight Mileage Tariff Number One."

2. The classes referred to in the said annexed tariff are those fixed by the Canadian Joint Freight Classification as the same shall be approved of from time to time by the Governor in Council ; but the company shall have the right to conform to any system of classification in use upon connecting roads in the United States in respect to through traffic to or from the United States.

3. The charges on all freight must be paid before delivery of the goods.

4. The said tariff shall be subject to the following rules and conditions of carriage of this company, and to such rules and conditions of the company as may hereinafter be from time to time enacted or adopted by the company, with the approval of the Governor in Council.

5. The company will not be responsible for any goods conveyed upon the railway unless the same be signed for as received by a duly authorized agent. The agent will only sign a receipt for goods upon receiving a declaration of shipping setting forth the description of the goods and the name and address of the consignee.

6. Agents are not authorized to receive bank notes, money, deeds, securities or other valuable papers, and the company will not be responsible for the loss of or damage to money, bills, promissory notes or securities, jewellery, trinkets, rings, precious stones, gold or silver manufactured or unmanufactured, gold or silver plate or plated articles, clocks, watches, time pieces, marble, lace, furs, silks in a manufactured or unmanufactured state, and whether wrought up or not wrought up with other materials ; writings, title deeds, prints, maps, paintings, engravings, pictures, stamps or other valuables ; nor for damage done to china, glass, eggs, wearing apparel, musical instruments, furniture, toys, castings, cast-iron, stoves, grindstones, tombstones, slate or other such hazardous or brittle article in packages or otherwise, whether delivered to be carried for hire or to accompany the person of any passenger on the railway.

7. The company will not be responsible for loss or damage occasioned by delay from storms or accidents or from the weather, fire, heat, frost, civil commotion, or unvoidable causes, or delay of any perishable articles. Fresh fish, meat, fruit, dressed hogs, poultry and all other perishable articles will be carried only at the owner's risk, and the freight charges must be prepaid.

8. The company will not carry any boiler, cylinder, piece of machinery, casting, stone or other articles of unusual bulk or weight, aquafortis, nitric acid, acetic acid, vitriol, friction matches or other dangerous articles, except under special contract or agreement.

9. Senders of dangerous articles will be held accountable for any damage arising therefrom, unless the nature of the contents is distinctly marked on the outside of the package containing the same, and unless notice in writing is also given to the station master or freight agent, that due care may be observed in loading and transporting it. The company will not be liable in any case for the loss of or damage to any such articles.

10. The company will carry gunpowder only on special agreement as to the rates of tolls and other conditions.

11. The company will not be responsible for the loss of or damage to any package or its contents insufficiently or improperly marked, packed, directed, or described, or containing articles liable to breakage, or, by breaking, to damage each other or other articles ; or for any loss or damage to cases of boots, shoes, or to any case or package containing articles liable to peculation or fraudulent abstraction, unless such case or package is strapped with iron or wood or otherwise securely protected ; or leakage of any kind.

12. The company will not be responsible for the loss of or damage to any goods put into returned wrappers or boxes or packages described as "empties", nor for any goods directed "to be left until called for", or "to order", or warehoused for the convenience of the parties to whom they belong, or by, or to whom they are consigned, nor for loss of or damage to goods that are not taken away immediately after advice of their arrival has been sent or posted.

13. The delivery of goods will be considered complete, and all responsibility will terminate when placed in the shed at the station to which they are consigned, and the warehousing of them will then be at the owner's risk and expense, except as to lumber, coal, bricks and goods of like bulk and description, and the delivery of which shall be complete, and all responsibility in connection with which shall terminate upon their being detached from the train whereby they have been drawn ; and it shall be lawful to send any goods for which store or warehouse room cannot be conveniently supplied at the station to the warehouse of any wharfinger or storehouseman that may be available, at the risk and expense of the owners of property so stored, and the charge of warehousing and conveyance shall form an additional lien upon such goods.

14. The company will not be responsible for any injury to grain by heating, nor for any deficiency in weight or measure of grain, &c., in bags or in bulk ; nor for any deficiency in weight, number or measure of lumber, ore, coal, iron or other mineral carried by the car-load ; nor for shrinkage or short weight or short measure of goods of any kind unless damage to the package can be shown to have happened whilst in the possession of the company.

15. The company shall have a lien on all goods transported over its lines for freight and charges thereon, as well as for any balance previously due for freight or otherwise by the owner or consignee ; and the said goods shall be liable to be sold by public auction or by private sale for the payment of the charges thereon and other balances due, and if the tolls are not paid within six weeks the company may sell the whole or any part of such goods. Should the said goods be of a perishable nature, same may be sold after giving the consignee or his agent one day's notice.

16. In respect of all goods addressed to consignees at points beyond places at which the company has stations, and respecting which goods no directions to the contrary have been received at these stations the company reserves the right to forward such goods to their destination by public carrier or otherwise as opportunity may afford, or to allow them to remain upon the railway premises or to send them to any public or private warehouse pending communication with the consignee at the risk of the owners. The company will not be responsible for any delay to such goods. The delivery of the goods by the company will be considered as complete, and the responsibility of the company will be considered to have ceased, when notice shall have been sent to some public carrier that such goods are at the station awaiting further conveyance. And the company will not be responsible for any loss of or any damage or detention that may happen to goods so sent to them, if such loss or damage or detention occur after the said notice, or beyond the limits of the railway. If the goods are allowed to remain on the railway premises or are sent to any public or private warehouse, they shall be at the risk of the owners for any damage arising from any cause whatever.

17. It is expressly agreed that the company does not contract for the safety, carriage, or delivery of any goods except on the company's lines, and where a through rate is named to a point reached by other carriers, either by land or by water, it is on the agreement that this company is to act only as agent of the owner of the goods as to that portion of the said rate required to meet the charges of other carriers; and if any goods be consigned to a point beyond the company's lines, that the goods may be handed over by the company for further conveyance to such carrier as the company may select, and the company, in so handing over the goods, shall be merely the agent of the owner, and the responsibility of the company in respect of any loss, misdelivery, detention, damage or injury by means whatsoever to any goods, shall cease so soon as the company shall either deliver them to the connecting carrier for further conveyance, or notify such carrier that it is ready to do so.

18. All freight to or from places beyond the company's lines shipped, or to be shipped, by water, shall, while not on the company's lines, or in its sheds or warehouses be entirely at the owner's risk.

19. All articles directed to be left at any way or flag station or platform where the company has no building for the storage of freight, or where there is no resident agent, must be prepaid, and will be at the risk of the owner whenever they are landed at such station or platform; and all articles brought there for conveyance will also be at the owner's risk until taken into the cars. Shippers sending goods to be left at such way or flag station or platform will be required to sign a release.

20. The time allowed by the company for the purpose of loading or unloading cars is 48 hours, exclusive of Sundays; after the expiration of that time, demurrage at the rate of $2 per car per day will be charged. This applies as well to cars that are not promptly loaded after being placed in position as to cars that are not unloaded after arrival. Cars which are required to be unloaded by consignee or owner may be discharged by the company at the consignee's or owner's expense. Any charge under this section shall be added to the freight charges, and the company shall have a lien therefor.

21. No claim for loss or damage will be allowed unless notice in writing is given to the station agent before the packages are removed.

22. Claims for loss or damage shall be computed on the value of property at time and place of shipment.

23. The company will not, under any circumstances, be liable for loss of market or other claim arising from delay or detention of any train or trains whether in starting or in any of the way stations or in the course of the journey. It does not undertake to send goods by any particular train or to connect with any particular train or ship of connecting carriers.

24. Rates and weights entered on receipts or shipping bills by shippers are not binding upon the company. Property that cannot be readily counted, weighed, or measured, will only be received as more or less, or shippers weight and count.

Provided that, in the event of the engine and crew being sent, after the work of loading and unloading is completed, to some point other than the point from which originally ordered for such special service, time shall count until the engine and crew are registered in at such other point, but shall not be computed for a longer period than would have been occupied in returning the engine and crew to original starting point.

32. If a regular or extra train is utilized for a special loading or unloading service, the minimum charge or toll shall be three dollars ($3.00) per hour, or part thereof, to be computed from the time such train stops on its regular run until the special service completed and the train ready to proceed from the place at which it commenced such special service.

33. High explosives, such as Ætna, Hercules, Atlas, Giant Powder, Dualine, Dynamite, and other explosives of which nitro-glycerine forms the basis, will not be received for shipment and transportation on the company's lines of railway, except subject to agreement providing for special tolls or rates, regulations, and conditions, and except at the shippers risk.

37. All shipments of high explosives, either carloads or less quantities, must be accompanied by a man in charge at shippers expense, who will be provided with free transportation over the company's lines.

38. All high explosives found on premises or in warehouses or cars of the company, packed, loaded, or marked in any manner other than prescribed by the conditions and rules of the company shall be forthwith removed and disposed of in any manner the company deems proper, and the company shall not be liable for any loss or damage resulting to the owner, shipper, or consignee.

General regulations.

39. The liability of the company for all goods transported upon its lines of railway, shall terminate upon arrival of goods at point of destination, or at the point on the company's lines nearest thereto, and notice given to the consignee by post or otherwise of such arrival; and the company shall not be responsible for loss or damage to such goods suffered or incurred after advice of arrival has been so given.

46. Consignors shall sign a release on the prescribed form of all claims against the company in respect of consignments shipped to flag stations, and, in case no such release is so signed, the goods will be received for transportation only when consigned to a regular billing station.

47. All perishable goods, refused, unclaimed or not promptly removed by the consignee, may be forthwith disposed of by the company, and the proceeds applied in payment of the costs of sale and transportation charges, and the balance may be paid to the parties legally entitled thereto; but the company shall not be responsible for loss or damage sustained by any person by reason of such sale.

Storage.

48. Storage, in addition to all other rates and tolls, will be charged on all freight remaining in stations for 48 hours after its arrival at the following rates, according to the Canadian Joint Freight Classification, and such freight will be at the owner's risk from time of arrival:—

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un Memorandum daté le 4 janvier 1904, du ministre de la Marine et des Pêcheries, soumettant au sujet du chapitre 48 de la législation de 1903, par laquelle à compter du premier jour de janvier mil neuf cent quatre la rivière Saguenay a été détachée de la circonscription de pilotage dans le port de Québec, que l'effet de la dite législation a été de détacher la rivière Saguenay du contrôle de l'administration de pilotage par la circonscription de pilotage en bas de Québec, et la mettre sous la juridiction de l'*Acte du pilotage*, chapitre 80 des Statuts revisés du Canada.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT qu'on a représenté que la largeur des allées entre les rangées d'animaux, etc., devrait être augmentée sur les navires engagés dans le transport du bétail depuis le Canada jusqu'à des ports dans le Royaume-Uni ; et il est jugé à propos que les règlements canadiens concernant le transport soient en conséquence modifiés,—

A ces causes, il plaît au Gouverneur général en conseil d'ordonner que le dernier paragraphe du quatrième article des règlements canadiens concernant l'expédition du bétail, tel que modifié par l'arrêté en conseil du 23 de juillet 1903, soit et il est par le présent abrogé, et remplacé par ce qui suit :—

" Les allées en front et entre les parcs servant à nourrir et abreuver les animaux doivent avoir une largeur de trois pieds, sauf aux bouts des allées dans la proue et la poupe du navire, et là où se trouvent des obstacles de moins de trois pieds de longueur la largeur sera réduite à un minimum de dix-huit pouces ; les allées en front et entre les parcs servant à nourrir et abreuver les chevaux doivent avoir une largeur minimum de trois pieds. Deux allées transversales ou plus, d'au moins dix-huit pouces de largeur doivent être laissées de chaque côté du pont de façon à ce que les dalots soient faciles d'accès et tenus libres. Pour les moutons, des allées transversales d'au moins dix-huit pouces pleins de largeur seront laissées entre les parcs et des allées d'avant en arrière trois pieds de largeur en front de chaque parc, sauf aux obstacles et aux bouts des allées, tel que prescrit pour les animaux, la largeur minimum peut être de dix-huit pouces. Lorsque les moutons sont parqués en deux étages, la largeur minimum des allées d'avant et d'arrière à la poupe et à la proue sera de deux pieds libres de toute obstruction. Un espace suffisant sera laissé aux côtés des écoutilles pour permettre d'atteindre facilement au fourrage dans la cale."

Il plaît de plus au Gouverneur général en conseil d'ordonner qu'aucune nourriture ou autre obstruction ne sera placée ou arrimée dans les allées.

Greffier du Conseil privé.

(*a*.) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

THOMAS B. FLINT,
Greffier des Communes.

Substance des règles et formes de procéder du Sénat concernant les bills de divorce.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire faite en vertu de "l'Acte de la preuve en Canada, 1893."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

The Minister further states that the Government of the Province of Manitoba has passed the necessary Order in Council re-vesting the said land in the Dominion Government in order that Mr. Sigurdsson's entry may be confirmed.

The Minister recommends that in exchange for the land so re-vested the S.E. ¼ of Section 10, Township 19, Range 2, West First Meridian, be vested in the Crown for the purposes of the Province of Manitoba.

Friday, the 8th day of January, 1904.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 21st December, 1903, from the Minister of the Interior, stating that provision is made in paragraph (i) of section 1, chapter 5, of 60-61 Victoria, being an Act to authorize a subsidy for a railway through the Crows' Nest Pass, for the conveyance to the Crown in the interest of Canada of fifty thousand acres of coal-bearing land obtained by the Railway Company from the Government of British Columbia as a subsidy in connection with the construction of their line, such fifty thousand acres to be selected by the Government in such fair and equitable manner as might be determined by the Governor in Council and to be thereafter held or disposed of or otherwise dealt with by the Government as it might think fit, on such conditions as might be prescribed by the Governor in Council, for the purpose of securing a sufficient and suitable supply of coal to the public at reasonable prices, not exceeding two dollars per ton of two thousand pounds free on board cars at the mines.

The Minister further states that a selection of the area in question was made under the provisions of the above section of the Act and this selection was approved by an Order in Council of the 19th May, 1902.

The Minister recommends, as the Regulations for the sale of coal mining lands in Manitoba, the North-west Territories and the Province of British Columbia approved by Order in Council of the 19th May, 1902, would not appear to be applicable to the above area and would not meet the provisions of the said Act, that no mining regulations or other regulations for the sale or disposal of Dominion Lands shall apply to the area of 50,000 acres above referred to, or any part thereof, but that these lands shall only be disposed of as specially authorized by Order in Council.

The Committee submit the same for approval.

JOHN J. McGEE,
Clerk of the Privy Council.

THE MANITOULIN AND NORTH SHORE RAILWAY COMPANY.

By-laws fixing and regulating tolls for transportation of passengers and goods upon the railway.

(*Approved in the terms of the Order in Council of 8th January*, 1904, *by His Excellency the Governor General).*

JOHN J. McGEE,
Clerk of the Privy Council.

By-law No. "A" of The Manitoulin and North Shore Railway Company, authorizing the directors to fix and regulate from time to time, by by-law, the tolls to be demanded and taken for all passengers and goods transported upon the railway.

Whereas it is deemed expedient that the directors of the company be authorized to fix and regulate from time to time by by-law the tolls to be demanded and taken for all passengers and goods transported upon the railway, and for other purposes incidental thereto.

Therefore be it enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

1. That the Board of Directors, be, and they are hereby authorized and empowered, to fix and regulate from time to time, by by-law, in such manner as they may deem expedient, the tolls to be demanded and taken for all passengers and goods transported upon the railway, or in steam or other vessels belonging to the company, and also all other tolls, rates, and charges, to be demanded and taken for the conveyance of passengers, the transportation, storage, and delivery of goods, the use and protection of the company's property, and for other purposes incidental thereto, or connected therewith.

2. The Board of Directors are hereby further empowered to alter, amend, repeal, and re-enact any by-law for the purposes aforesaid, or any of them, at such times and in such manner as they may deem advisable.

The foregoing by-law No. "A" was duly passed and enacted by the shareholders of The Manitoulin and North Shore Railway Company at a special general meeting held at the Town of Sault Ste. Marie, in the District of Algoma and Province of Ontario, on the 1st day of April, 1902.

In witness whereof the corporate seal of the said company has been hereto affixed, attested by the hands of its vice-president and secretary.

MANITOULIN AND NORTH SHORE RY. CO.

[Company's Seal.]

T. C. Search,
Vice-president.

I. P. Hood,
Secretary.

By-law No. "B" of The Manitoulin and North Shore Railway Company to fix and regulate the tolls to be demanded and taken for the transportation of passengers upon the railway, and to regulate the conduct of passengers and persons using the property of the company, and for other purposes.

Whereas it is expedient and necessary, in pursuance of The Railway Act of the Parliament of Canada, and the Acts respecting the incorporation of The Manitoulin and North Shore Railway Company, that a by-law be passed, fixing and regulating the tolls to be demanded and taken for the transportation of passengers upon the railway, and for other purposes :

Therefore it is hereby enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

Passenger tolls and conditions of carriage.

1. The maximum rate for the conveyance of passengers upon the company's lines of railway, and upon its branches, and upon leased lines operated by the company, shall be four cents per mile, excepting between points on Manitoulin Island where the rate shall be three and a third cents per mile ; fares will be computed according to the mileage between stations, adding one mile instead of any fraction less than a mile, and also adding a sufficient number of cents to make the fare end in 0 or 5 ; but tickets may at any time be sold at a lower rate, provided that the same rates are under the same circumstances charged equally to all persons.

2. Officers and agents for the sale of tickets are provided, at each of the company's stations (except flag stations) and elsewhere. At chief stations the ticket office will be open at least twenty minutes, and at smaller stations ten minutes, before the departure of each train. All passengers travelling upon the company's lines are required to provide themselves with tickets before entering the train.

3. Passengers holding reduced fare certificates, entitling them to purchase tickets at less than the regular fare (under certain conditions which form part of contract and are endorsed on certificate) must present such certificate at the regular ticket office of the company at least ten minutes prior to the time the train is due to leave, in order to procure tickets at the reduced fare.

4. Delegates to conventions, conferences, and meetings of societies travelling on certificates as issued under the "Convention Plan", in order to obtain the reduced fare for the return journey, must present their certificates properly signed by the Secretary of the Convention at the regular ticket office of the company, at the point at which convention is held, at least ten minutes prior to the time the train is due to leave.

5. Passengers travelling on reduced fare tickets, issued on authority of reduced fare certificates, and so endorsed, must present such certificates to conductor with railway ticket when called upon to do so.

6. In the case of passengers taking the train at points where tickets are sold, the sum of ten cents over and above the regular fare will be charged for each ticket purchased from the conducter on any of the trains of the company, but it shall be the duty of

such conductor to give to every person when purchasing such ticket a rebate check, and, on presentation of such rebate check at any ticket office of the company within thirty days from the date of issue, the said ten cents will be refunded.

7. Any ticket issued, limited by reasonable conditions as to the time within which it is to be used, or as to the train or class of car for which it is available, will not be accepted after the expiration of the time limited by the condition, nor for a different class of car, nor for a different train, but the holder of such ticket will be required to pay the usual fare in full, or present a ticket, good for the time, train, and car, and if he do not do so, shall be considered to be a person refusing to pay his fare within the meaning of this by-law and section 248 of The Railway Act.

8. Nothing herein contained shall affect the right of any person to recover a refund for any such ticket under the Act respecting the sale of Railway Passenger Tickets.

9. Any person without a ticket, or refusing upon request to produce the same, and refusing to pay fare, may be removed from the train with his baggage at any usual stopping place, or near any dwelling house, as the conductor may elect, the conductor first stopping the train and using no unnecessary force.

10. Whenever and so often as the conductor for the time being of any train requests any passenger to produce his or her ticket, such passenger shall comply with the request, or, in default thereof, shall be liable to pay, and shall forthwith pay, the regular fare from the place where such passenger got on the train to the end of his or her journey.

11. Persons intoxicated or otherwise unable to take care of themselves will not be furnished with tickets or allowed to enter the cars or premises of the company.

12. Passengers and all other persons using the property of the company are required to conduct themselves with propriety, and to obey the reasonable requests of the station-master, conductor, or other officer of the company, with a view to promote the general comfort and convenience, and to maintain order and decorum.

13. Passengers are not entitled to occupy more than one sitting in a passenger car for each ticket, nor to fill up the seats with valises or hand baggage, so as to exclude other passengers.

14. Any person in or upon a carriage, station, platform of the company, or elsewhere upon the company's premises, in a state of intoxication, or fighting, or guilty of other disorderly conduct, or using foul, obscene, or abusive language, or otherwise wilfully interfering with the comfort of other passengers, is guilty of an offence under this by-law. In addition to the liability to fine under this section, any such person may be summarily ejected from such station or premises of the company, or, in the case of a moving train, such person may be removed or ejected from the train, at any usual stopping place or near a dwelling house, and the conductor and train servants may use force, doing no unnecessary violence, to restrain passengers and others upon the train from fighting, using foul, obscene, or abusive language, or other disorderly conduct.

15. No person will be allowed to travel without a ticket or pass signed by an authorized officer.

16. No person shall sell beer, wine, spirits or intoxicating liquor of any kind upon any train, car, station, or premises of the company, except persons duly authorized; and no person will be allowed to sell any papers, cigars, candy, fruit or any other goods, or merchandise, upon any of the trains or premises of the company, except the duly authorized agents of the company appointed for that purpose.

17. Smoking in cars, except those specially set apart for that purpose, or in the station or general waiting rooms, other than rooms specially set apart as smoking rooms, is forbidden.

18. The waiting rooms are provided for the use of the travelling public only. All other persons may be excluded from them by the servants of the company, and no person shall obstruct or molest any passenger or passengers while entering or quitting a station or car.

19. Beggars, pedlers, or itinerant musicians will not be allowed to practise their vocation upon the train, or in or upon the stations, platforms, or other premises of the company.

20. Gambling, or the playing of any game of cards, or of chance, for money, will not be permitted on any train or premises of the company, and any person or persons who refuse to comply with the request of the conductor or agent to cease playing such games or gambling will be liable to be removed from the train at any usual stopping place, or near any dwelling house, or from the station or premises of the company, as the case my be.

21. By-Law No. "C." of The Manitoulin and North Shore Railway Company, to fix and regulate tolls to be demanded and taken for transportation of goods, and the conditions of carriage.

Whereas it is expedient and necessary, in pursuance of the powers conferred upon the said company by The Railway Act of Canada, that a by-law be passed fixing and regulating the tolls to be demanded and taken for the transportation of goods, and the conditions of carriage,—

Therefore it is hereby enacted by The Manitoulin and North Shore Railway Company as a by-law of the said company :—

Freight tolls and charges.

1. The tariff of rates to be taken for freight rates and tolls on the lines of railway of the said company, or upon any branch or line of railway leased or operated by the said company, shall be according to the tariff set forth in the schedule hereunto annexed, called "Local Freight Mileage Tariff Number One."

2. The classes referred to in the said annexed tariff are those fixed by the Canadian Joint Freight Classification as the same shall be approved of from time to time by the Governor in Council ; but the company shall have the right to conform to any system of classification in use upon connecting roads in the United States in respect to through traffic to or from the United States.

3. The charges on all freight must be paid before delivery of the goods.

4. The said tariff shall be subject to the following rules and conditions of carriage of this company, and to such rules and conditions of the company as may hereinafter be from time to time enacted or adopted by the company, with the approval of the Governor in Council.

General conditions of carriage.

5. The company will not be responsible for any goods conveyed upon the railway unless the same be signed for as received by a duly authorized agent. The agent will only sign a receipt for goods upon receiving a declaration of shipping setting forth the description of the goods and the name and address of the consignee.

6. Agents are not authorized to receive bank notes, money, deeds, securities or other valuable papers, and the company will not be responsible for the loss of or damage to money, bills, promissory notes or securities, jewellery, trinkets, rings, precious stones, gold or silver manufactured or unmanufactured, gold or silver plate or plated articles, clocks, watches, time pieces, marble, lace, furs, silks in a manufactured or unmanufactured state, and whether wrought up or not wrought up with other materials ; writings, title deeds, prints, maps, paintings, engravings, pictures, stamps or other valuables ; nor for damage done to china, glass, eggs, wearing apparel, musical instruments, furniture, toys, castings, cast-iron, stoves, grindstones, tombstones, slate or other such hazardous or brittle article in packages or otherwise, whether delivered to be carried for hire or to accompany the person of any passenger on the railway.

7. The company will not be responsible for loss or damage occasioned by delay from storms or accidents or from the weather, fire, heat, frost, civil commotion, or unvoidable causes, or delay of any perishable articles. Fresh fish, meat, fruit, dressed hogs, poultry and all other perishable articles will be carried only at the owner's risk, and the freight charges must be prepaid.

8. The company will not carry any boiler, cylinder, piece of machinery, casting, stone or other articles of unusual bulk or weight, aquafortis, nitric acid, acetic acid, vitriol, friction matches or other dangerous articles, except under special contract or agreement.

9. Senders of dangerous articles will be held accountable for any damage arising therefrom, unless the nature of the contents is distinctly marked on the outside of the package containing the same, and unless notice in writing is also given to the station master or freight agent, that due care may be observed in loading and transporting it. The company will not be liable in any case for the loss of or damage to any such articles.

10. The company will carry gunpowder only on special agreement as to the rates of tolls and other conditions.

11. The company will not be responsible for the loss of or damage to any package or its contents insufficiently or improperly marked, packed, directed, or described, or containing articles liable to breakage, or, by breaking, to damage each other or other articles ; or for any loss or damage to cases of boots, shoes, or to any case or package containing articles liable to peculation or fraudulent abstraction, unless such case or package is strapped with iron or wood or otherwise securely protected ; or leakage of any kind.

12. The company will not be responsible for the loss of or damage to any goods put into returned wrappers or boxes or packages described as "empties", nor for any goods directed "to be left until called for", or "to order", or warehoused for the convenience of the parties to whom they belong, or by, or to whom they are consigned, nor for loss of or damage to goods that are not taken away immediately after advice of their arrival has been sent or posted.

13. The delivery of goods will be considered complete, and all responsibility will terminate when placed in the shed at the station to which they are consigned, and the warehousing of them will then be at the owner's risk and expense, except as to lumber, coal, bricks and goods of like bulk and description, and the delivery of which shall be complete, and all responsibility in connection with which shall terminate upon their being detached from the train whereby they have been drawn ; and it shall be lawful to send any goods for which store or warehouse room cannot be conveniently supplied at the station to the warehouse of any wharfinger or storehouseman that may be available, at the risk and expense of the owners of property so stored, and the charge of warehousing and conveyance shall form an additional lien upon such goods.

14. The company will not be responsible for any injury to grain by heating, nor for any deficiency in weight or measure of grain, &c., in bags or in bulk ; nor for any deficiency in weight, number or measure of lumber, ore, coal, iron or other mineral carried by the car-load ; nor for shrinkage or short weight or short measure of goods of any kind unless damage to the package can be shown to have happened whilst in the possession of the company.

15. The company shall have a lien on all goods transported over its lines for freight and charges thereon, as well as for any balance previously due for freight or otherwise by the owner or consignee ; and the said goods shall be liable to be sold by public auction or by private sale for the payment of the charges thereon and other balances due, and if the tolls are not paid within six weeks the company may sell the whole or any part of such goods. Should the said goods be of a perishable nature, same may be sold after giving the consignee or his agent one day's notice.

16. In respect of all goods addressed to consignees at points beyond places at which the company has stations, and respecting which goods no directions to the contrary have been received at these stations the company reserves the right to forward such goods to their destination by public carrier or otherwise as opportunity may afford, or to allow them to remain upon the railway premises or to send them to any public or private warehouse pending communication with the consignee at the risk of the owners. The company will not be responsible for any delay to such goods. The delivery of the goods by the company will be considered as complete, and the responsibility of the company will be considered to have ceased, when notice shall have been sent to some public carrier that such goods are at the station awaiting further conveyance. And the company will not be responsible for any loss of or any damage or detention that may happen to goods so sent to them, if such loss or damage or detention occur after the said notice, or beyond the limits of the railway. If the goods are allowed to remain on the railway premises or are sent to any public or private warehouse, they shall be at the risk of the owners for any damage arising from any cause whatever.

17. It is expressly agreed that the company does not contract for the safety, carriage, or delivery of any goods except on the company's lines, and where a through rate is named to a point reached by other carriers, either by land or by water, it is on the agreement that this company is to act only as agent of the owner of the goods as to that portion of the said rate required to meet the charges of other carriers; and if any goods be consigned to a point beyond the company's lines, that the goods may be handed over by the company for further conveyance to such carrier as the company may select, and the company, in so handing over the goods, shall be merely the agent of the owner, and the responsibility of the company in respect of any loss, misdelivery, detention, damage or injury by means whatsoever to any goods, shall cease so soon as the company shall either deliver them to the connecting carrier for further conveyance, or notify such carrier that it is ready to do so.

18. All freight to or from places beyond the company's lines shipped, or to be shipped, by water, shall, while not on the company's lines, or in its sheds or warehouses be entirely at the owner's risk.

19. All articles directed to be left at any way or flag station or platform where the company has no building for the storage of freight, or where there is no resident agent, must be prepaid, and will be at the risk of the owner whenever they are landed at such station or platform; and all articles brought there for conveyance will also be at the owner's risk until taken into the cars. Shippers sending goods to be left at such way or flag station or platform will be required to sign a release.

20. The time allowed by the company for the purpose of loading or unloading cars is 48 hours, exclusive of Sundays; after the expiration of that time, demurrage at the rate of $2 per car per day will be charged. This applies as well to cars that are not promptly loaded after being placed in position as to cars that are not unloaded after arrival. Cars which are required to be unloaded by consignee or owner may be discharged by the company at the consignee's or owner's expense. Any charge under this section shall be added to the freight charges, and the company shall have a lien therefor.

21. No claim for loss or damage will be allowed unless notice in writing is given to the station agent before the packages are removed.

22. Claims for loss or damage shall be computed on the value of property at time and place of shipment.

23. The company will not, under any circumstances, be liable for loss of market or other claim arising from delay or detention of any train or trains whether in starting or in any of the way stations or in the course of the journey. It does not undertake to send goods by any particular train or to connect with any particular train or ship of connecting carriers.

24. Rates and weights entered on receipts or shipping bills by shippers are not binding upon the company. Property that cannot be readily counted, weighed, or measured, will only be received as more or less, or shippers weight and count.

25. Goods going to or from any place out of Canada are subject to customs charges and regulations, and the company will not be responsible for any loss or damage arising from detention, inspection, or handling.

26. Live stock will only be carried at owner's risk under the regulation of the Canadian Joint Freight Classification, and the shippers will be required to execute a release in accordance with the terms of the live stock transportation contract which shall be duly filled up and executed before the stock is delivered to the company.

27. When cars are liable to be laden or unladen by the owner or consignee of the goods have been once placed, and, for the convenience of the owner, at his request are shifted to another berth in the same yard, a charge of $1 per car will be made for such service.

28. Yardage at the rate of 10 cents per ton per day will be charged on all lumber or other material left upon the wharves or other premises of the railway. This charge will commence 48 hours after the lumber or other materials have been placed on the railway premises. This charge will not apply to materials which are in sheds or warehouses, or which are on cars.

Special Commodity Tolls.

29. Logs, telegraph poles, fence and paving posts, timber, pulpwood, firewood, slag, brick, sand, gravel, stone (rough), and coal in car loads, may, at the option of the company, be carried, subject to the following special commodity tariff, namely:

Over 10 miles and not over 15 miles	5 cents per 100 pounds.

30. Timber, cordwood, or other freight will not be loaded or unloaded at points on the Main line, between stations, without written authority first obtained from the General Superintendent for each and every case where shippers and consignees desire this service performed.

31. The minimum charge for such service shall be fifteen ($15.00) dollars for any part of one day, and the charge or toll therefor shall be at the rate of three dollars ($3.00) per hour, to be computed from the time the engine and crew are ordered out for such service until registered in again, but not including time during which engine and crew are laid up for the night. Provided that, in the event of the engine and crew being sent, after the work of loading and unloading is completed, to some point other than the point from which originally ordered for such special service, time shall count until the engine and crew are registered in at such other point, but shall not be computed for a longer period than would have been occupied in returning the engine and crew to original starting point.

32. If a regular or extra train is utilized for a special loading or unloading service, the minimum charge or toll shall be three dollars ($3.00) per hour, or part thereof, to be computed from the time such train stops on its regular run until the special service completed and the train ready to proceed from the place at which it commenced such special service.

Explosives.

33. High explosives, such as Ætna, Hercules, Atlas, Giant Powder, Dualine, Dynamite, and other explosives of which nitro-glycerine forms the basis, will not be received for shipment and transportation on the company's lines of railway, except subject to agreement providing for special tolls or rates, regulations, and conditions, and except at the shippers risk.

34. The tolls to be demanded and taken for transportation of said high explosives shall be in accordance with Maximum Mileage Tariffs, governed by the following classification:—

Carloads, 20,000 pounds or over..First class.

35. The minimum charge or rate for transportation of single or small shipments of high explosives shall be equivalent to fourth class rate for 15,000 pounds.

37. All shipments of high explosives, either carloads or less quantities, must be accompanied by a man in charge at shippers expense, who will be provided with free transportation over the company's lines.

38. All high explosives found on premises or in warehouses or cars of the company, packed, loaded, or marked in any manner other than prescribed by the conditions and rules of the company shall be forthwith removed and disposed of in any manner the company deems proper, and the company shall not be liable for any loss or damage resulting to the owner, shipper, or consignee.

General regulations.

39. The liability of the company for all goods transported upon its lines of railway, shall terminate upon arrival of goods at point of destination, or at the point on the company's lines nearest thereto, and notice given to the consignee by post or otherwise of such arrival; and the company shall not be responsible for loss or damage to such goods suffered or incurred after advice of arrival has been so given.

40. All goods not removed by consignees upon arrival at destination, may be placed by the company in any convenient freight shed, station, store, warehouse, or building, and at the sole risk of the owners, shippers, or consignees thereof; and such goods shall be subject to a lien for payment, of all cartage, storage, and wharfage charges, in addition to the tolls herein provided for, for freight.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 7th day of December, 1903.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 26th February, 1903, from the Minister of the Interior, stating that in March, 1900, hydraulic mining lease No. 10 was issued in favour of Mr. Joseph W. Boyle of a tract of land extending for three and one-third miles along the west side of Quartz Creek, a tributary of the Indian River, in the Yukon Territory, which has since been assigned to the Quartz Creek (Yukon) Syndicate Limited, and the lessees right to water on this location, or to the diversion of water in connection with their operations thereon were made subject to the Regulations approved by the Governor General in Council on the 3rd of August, 1898.

The Minister further states that the lessees have now applied for permission to divert 1,000 miners' inches of water from Ruby Creek, a tributary of the Indian River on its left limit, for the operation of their location, also the right to take water, subject to the rights of placer miners, from such creeks or tributaries as may be crossed by the ditch or ditches constructed by them in connection with the grant which may be made to them.

This application was referred to the Honourable J. H. Ross, the Commissioner of the Territory for a report, and in reply he stated that the water from any creek or tributary crossed by a ditch should be applied for and granted as an original application in each case; that before any portion of the water to be diverted is sold or disposed of by the grantees they should show conclusively that such water is for the use of the miners along the line of the ditch, and not for the benefit of any person or company who may have the right to sell water, and thereby control the supply; that he is not aware of any objection to the applicants being permitted to divert water from Ruby Creek and the tributaries thereof which may be crossed by the ditch, also from Indian River, provided they do not in any way obstruct the latter stream or interfere with any operations which may be carried on thereon; but that no water from creeks or tributaries entering the Indian River on its right limit along the line of the ditch or ditches should be granted to the applicants.

The Minister observes that the Regulations established by the Governor General in Council on the 3rd

August, 1898, above referred to, provide that the Mining Recorder may, upon application, grant the right to divert water from any stream or lake in the Yukon Territory, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water, but by Order in Council dated the 7th of December, 1901, the provision made in these Regulations that the owner of a ditch or water privilege might sell or dispose of the water granted was rescinded.

The Minister in accordance with the report made by Mr. Ross, the former Commissioner of the Yukon Territory, recommends that the above Syndicate be granted the right to divert the quantity of water applied for from Ruby Creek, in accordance with the provisions of the Regulations approved by the Order in Council dated the 3rd of August, 1898, and the amendments thereto, also the right to apply to the Gold Commissioner for such grants as he deems proper to enable the Syndicate to divert water from the Indian River and from the creeks and tributaries on the left limit thereof, which may be crossed by the ditch or ditches constructed in connection with the grant which may be made to them, the works for the diversion of water to be constructed to the satisfaction of the Government Mining Engineer.

The Minister, also recommends that the Commissioner of the Yukon Territory may, under special circumstances, and upon such terms and conditions as may be approved by the Yukon Council, permit the grantees to dispose of a portion of the water which they may divert from Ruby Creek, and also a portion of the water which they may acquire under separate grants made in accordance with the provisions of the Regulations, from the creeks and tributaries which may be crossed by the ditch or ditches constructed by them, upon proof to the satisfaction of the Commissioner being furnished that such water is for the use of the miners along the line of the ditch or ditches, and not for the benefit of any person or company who may have the right to sell water.

The Committee submit the same for approval.

JOHN J. McGEE,
31-4 Clerk of the Privy Council.

ONTARIO.

(1) LAKE SUPERIOR—SAILING DIRECTIONS.

The following preliminary sailing directions for portions of the Canadian shore of Lake Superior have been written by Mr. W. J. Stewart, in charge of the Canadian hydrographic survey of the great lakes, to replace the information contained in pages 20 and 21, 26 and 27 of bulletin No. 13 of the Survey of northern and northwestern lakes, published by the U. S. war department in 1903:

Pigeon bay has deep water all along its south shore. The bay is not well suitable for anchoring in, as most of the water is very deep, and two small rocks (not shown on the chart) with 7 and 8 feet water over them, lie between Gull rocks (in the mouth of the south arm) and the mouth of Pigeon river.

(See N. to M. No. 95 (240) of 1903.)

Pine river bay, into which Pine river empties, is a shallow indentation 1½ miles north of Pigeon point. It is difficult of access, but contains good shelter and holding ground for small craft.

Pine point, 2 miles northeast of Pigeon point, is steep-to on all sides, and forms the southeast entrance point to Big Trout bay, which contains excellent shelter from all but northeast and east winds. The anchorage, however, is nearly all over 10 fathoms, but the shores are clean.

Cloud islands, three in number, with a detached rock one-quarter mile northeast, lie in the mouth of Big Trout bay. A very shallow spit makes out 250 yards southwest from the south island, and a rock with 9 feet over it lies 150 yards east-northeast from the north island. With these two exceptions, the shores of the islands and the detached rock are quite clean.

McKellar point, 2½ miles northeast of Pine point, is steep-to on all sides, and is the east entrance point to Little Trout bay, with clean shores, excellent anchorage in less than 10 fathoms, and shelter from all winds.

Cloud bay, one mile northwest of McKellar point, is really an arm of Little Trout bay. It contains limited anchorage space in its middle, the shores being shallow.

Sucker island is a small island 2 miles northeast of McKellar point. It is surrounded by shallow water for a distance of 200 yards. The shore between it and Cloud bay is deep-to.

Crystal island is half a mile east of Sucker island. It has very little shallow water off it.

Grassy point, a low gravel point, covered with grass, bears E N.E. 3 miles from McKellar point and one mile N.N.E. from Victoria island lighthouse. It is important on account of the small rock with 6 feet water over it, lying 500 yards S. by W. of it. A red spar buoy marks this danger.

Jarvis point lies 1¼ miles northeast of Grassy point, and between them is a slight indentation with steep shores. It is deep-to on all sides.

Prince bay is an indentation about a mile square, lying to the westward of Jarvis point. In the north corner will be found shallow anchorage for small boats, and in the southwest corner limited space for larger craft.

Mink point, also steep-to, lies 2 miles northeast of Jarvis point.

Mink island, 1½ miles long, quite narrow and high, lies 750 yards northeast of Mink point. The island has deep water all round it, and the channel between the point and island is deep and clean.

Sister islands, two in number, lie half to one mile eastnortheast of the northeast end of Mink island. They are steep-to on all sides. A rock awash lies in the middle of the passage between Mink island and the Sisters, having good water between it and the latter, through which nearly all the boats pass. Another small rock with 5 feet over it, lies 500 yards eastnortheast of the northeast Sister island.

Sturgeon point, marked by a small islet off it, is situated 2½ miles eastnortheast from Mink point. It also is steep-to. The bay between its shore and Mink island is called Mink bay, and contains good anchorage in its southwest corner, between the two small islets there.

Sturgeon bay is a shallow bay with a narrow entrance, one mile east of Sturgeon point. Off the north shore of Sturgeon point will be found good anchorage.

North by east 1,200 yards from Sturgeon point and 400 yards off the shore abreast it, is a small boulder shoal, with only 4 feet water over it.

Flatland island is, in marked contrast to all the other islands in the vicinity, low and flat. From its southwest point, a reef and a long narrow island almost connect it with the mainland, but off the west side is an excellent harbour, with from 3 to 4½ fathoms water in it; the entrance being from the north between Birch island and the mainland. From the southeast point of the island extend in an eastnortheasterly direction several small islands and rocks for a distance of 600 yards, the outer one being called Little Flatland island.

The south side of this string has very shoal water off it one quarter of a mile, but Little Flatland is clean on its north, south and east sides. A dangerous reef, with only 7 feet water over it, extends north by east 2,000 yards from the north side of Flatland island, to clear which, on the north end, keep the lower bluff on Thunder cape in sight north of Pie island bearing E. by N. ¾ N., and to pass east keep Spar island open east of Flatland island, bearing S. ½ E.

The shore from Birch island to Grand point is clean except for Squaw and Brulé bays (near Grand point) in which the water is not very deep. Off Grand point a very shallow bank lies about a quarter of a mile, leaving good water inside.

From Grand point to Port Arthur the shore is fronted by a shallow mud flat for an average distance of three quarters of a mile. The principal mouth of the Kaministikwia river and entrance to Fort William is situated 6 miles north of Grand point. The channel is dredged and the outer end marked by a platform buoy, surmounted by a wooden cage 8 feet high and painted red, from the top of which is exhibited a fixed white light visible 4 miles. The axis of the channel is marked by 2 range lights, on the shore near the C.P.R. coal pile, which exhibit fixed red lights visible 10 miles. Nineteen feet water may be carried into fort William (well marked by the numerous grain elevators), the principal harbour of the Canadian Pacific Railway Company, and from which large quantities of grain are shipped east. Sixteen feet water may be carried five miles up the river to the coal unloading plant of the Canadian Northern Railway.

Port Arthur is rendered safe by a breakwater parallel to the shore and about 2 miles long, the entrance being through a gap near the south end and marked by a fixed red light, 43 feet high, upon the northern portion of the breakwater. The channel is dredged and 19 feet may be carried to the Northern Railway Company's elevator. Port Arthur is the present terminus of the Canadian Northern Railway, and large quantities of freight pass through. The Pigeon river Lumber Company have a large saw mill here. Fort William and Port Arthur are connected by an electric railway and have a common telephone system.

Welcome islands, four in number, lie 4 miles southeast of the entrance to Fort William. The northern two are each about half a mile long, and a quarter of a mile wide, the other two are quite small. Shoal water extends a quarter of a mile south from both the northern and southern islands, all the other shores being clean. The channel between Welcome islands and Mutton island, off the mouth of the Kaministikwia river, is 1½ miles wide and from 4 to 8 fathoms deep.

Victoria island is the southernmost of a long narrow string of islands that stretches nearly to Thunder cape, a distance of 24 miles, and give shelter to an excellent channel from Victoria island to Port Arthur. The west point of this island is marked by a lighthouse exhibiting a fixed white light visible 10 miles from a height of 90 feet above the water, and off its point

extends in a westsouthwesterly direction, a shallow reef for 150 yards. This is especially dangerous for vessels entering or leaving the inside passage as it juts out into the channel. The bay south of lighthouse point is rather deep for anchoring, but the shores are clean.

Iroquois rock with 6 feet water on it lies 1000 yards west-southwest of the lighthouse point and is a dangerous rock leaving a deep channel over 700 yards wide between it and the reef off the lighthouse point. As the rock is very small vessels may pass upon either side of it. To pass north of it, keep Sugarloaf hill on Spar island in sight north of Victoria island, N. E. by E. ⅝ E. and to pass south of it, bring the northwest side of Spar island in line with the north side of Victoria island (lighthouse point) N. E. by E. It is proposed to keep this shoal buoyed in future.

Tiger island is the hign black island lying a quarter of a mile south of Victoria island lighthouse. It and the small islands stretching 2 miles east of it are quite clean. There is a large cove in the east side of Victoria island, but the water in it is about 17 fathoms deep. A couple of shallow rocks lie off the dry rock at the southeast entrance to this cove, one is 300 yards northeast and the other 150 yards south of it. Another rock with only 4 feet water over it lies nearly in the middle of the entrance to the cove and must be carefully guarded against by keeping rather nearer the southwest side. The remainder of the south and all the north shore of Victoria island are quite deep-to.

Little Devil, Devil, and Jarvis islands are the next islands east of Victoria island. They are quite clean off their north and south sides. A narrow channel with 21 feet water in it exists between Devil and Jarvis islands. Spar is the next large island about 2½ miles long, northeast and southwest, by half a mile wide. A rock awash lies a quarter of a mile off a point on the northwest side and three quarters of a mile from the southwest end. With this exception the shores are clean. There is a safe clean passage a quarter of a mile wide between Spar and Jarvis islands with 15 fathoms water in it.

Thompson island lies with its southwest end 2 miles northeast of Spar island. It is 3 miles long northeast and southwest by half a mile in greatest width and is over 100 feet high. It has deep water all round it. In the gap between Spar and Thompson islands are several small islands and rocks, dry and sunken, with good passages between them, but which should not be attempted by strangers without a chart.

Stratching northeast from Thompson island for a mile to McKellar island are several small islands with no passages between, but which have good clean shores. The gap between these islands and Pie island is very deep and clear of obstructions.

Pie island, about 900 feet high, is about 7 miles long, east and west by 3½ wide, and has only slight indentations in its shores. Except the north and northeast, which should receive a berth of half a mile, the shores are clear of dangers. Good anchorage from southerly winds will be found off the north and northwest sides, and from northerly winds off the south side. Dawson bay in the south side is large, but the water is deep.

Pie island light, fixed white, 29 feet high, is situated on a narrow, rocky point on the southwest side of the island.

Steamboat and Deadman islands are small and lie from half to one mile off the southwest side of Pie island. They are clean outside a distance of 200 yards, and between them and Little Flatland island is a good clean passage, 1,500 yards wide and from 5 to 15 fathoms deep.

Angus islands are a small group, 6 in number, lying one mile southeast of the east point of Pie island. There is a shallow spit making out one quarter of a mile northeast from the north end of Angus islands, and with this exception the islands are clean.

Between the southwestern Angus island (a high bare peak) and Pie island are three shallow rocks, as follows : one awash lies W. by N. ¼ N., 2,000 yards from this Angus island ; another with 4 feet water on it lies E. ¼ N., 3,500 yards from the south point of Pie island ; and the other, and most important, with 6 feet water over it, is situated E. by S. ½ S., 2,500 yards from the same point. As this lies inside the line joining the outer Angus and McKellar islands, masters of vessels need not be so much afraid of this shore as they appear to be.

The passage between Pie island and Thunder cape, 4½ miles wide, is quite clean.

Thunder cape is a very prominent headland, about 800 feet high, marking the east entrance to Thunder bay. Upon its south end is a lighthouse tower, 45 feet high, exhibiting a revolving white light every minute, visible 12 miles. A steam fog horn sounds blasts of 5 seconds every half minute. All parts of the cape may be approached to 200 yards.

Hare island is small and low, bearing N. W. 1½ miles from the cape. It has shallow water extending south and north from it for a distance of 700 yards. To pass south of it keep the south end of Marvin island in line with Thunder cape, E. by S. The whole of the east shore of Thunder bay to its head is very clean.

Sawyer bay is situated 5 miles north from the cape and contains good shelter and holding ground from all winds except those between west and north.

A shoal with 16 feet water on it has been reported as lying N.E. by E ½ E., 3¼ miles from the north point of Welcome islands.

Vessels proceeding to Port Arthur and Fort William from the eastward should give Thunder cape a berth of at least one quarter of a mile heading for the middle of the Welcomes bearing W. N. W. As soon as Hare island comes abreast alter course to pass half a mile clear of the northeast end of the Welcomes, or heading upon Fort Arthur lighthouse, 13 miles.

If bound for Fort William, a vessel may keep this course until the range comes on, or for 9½ miles.

Vessels from Duluth for Port Arthur or Fort William in thick weather keep nearer Isle Royale and enter the by close to Thunder cape. There is no reason why vessels should not keep closer to the Canadian islands, give Angus island a berth of half a mile, and haul up N. W. by N. to clear the Welcomes by the same distance. In clear weather, vessels trading between Port Arthur and Duluth use the shorter and more sheltered passage west of Pie and Victoria islands. From Duluth for Port Arthur, shortly after passing Cloud islands bring the west side of Sister islands in line with Grassy point, N. E. ⅛ N., to pass between Iroquois rock and the reef of Victoria island. If these marks cannot be distinguished and there is no buoy on Iroquois rock a vessel should haul close to Tiger island and steer to pass 300 yards off Victoria island, until the east end of Tiger island comes in line with the west or lighthouse point of Victoria island. Now alter course to pass about 200 yards off the north side of Victoria island to avoid the 6-foot shoal off Grassy point. When abreast of Grassy point steer for the northwest side of Spar island for 2½ miles or until the west side of Pie island comes in line with the west side of the Sisters, bearing N. N. E. ¾ E :—keep on this range for 3¾ miles. This will clear the rock awash between the Sisters and Mink island. Pass through the passage giving west Sister a berth of 200 yards and head up for the west side of Pie island, bearing N. N. E. ¾ E., steering thus for 5½ miles until Pie island light comes abreast, when haul up N. ⅜ E. for 10 miles to give Welcome islands a berth of half a mile. As soon as the north end of the latter islands comes abreast, a vessel may haul over for the buoy off Fort William or keep on for the buoys off Port Arthur.

At night, those locally acquainted pass between Mink point and Mink island, giving the latter a berth of 200 yards, and haul up for Pie island light bearing N. E. ¼ N. until Deadman island comes abreast when they haul up for the Welcomes.

In leaving Port Arthur and Fort William, when clear of the entrance, head for south end of the Welcomes until about half a mile from them. Then steer to pass the same distance off the west shore of Pie island or heading for Deadman island. When Pie island light comes abreast, haul for the gap between the Sisters and Mink island, give the west end of West Sister a berth of 300 yards to avoid the rock awash

between it and Mink island. Now bring the west side of Pie island in line with the west side of the Sisters, heading for the west end of Jarvis island. As soon as the north side of Cloud islands comes in line with the north side of Victoria island, S. W. by W., keep it so, rounding the lighthouse point at a distance of 300 yards, taking care not to pass northwest of the line, north side of the Sisters in one with Grassy point, to avoid Iroquois rock.

Masters of vessels leaving Port Arthur or Fort William for Whitefish point will find a very good check for their course across the lake, by noticing the bearing by their own compasses of the range :—Thunder cape lighthouse in line with the north end of the Welcomes, S. 63° 50′ E. The average magnetic course across the lake from a point one mile south of Passage island light to a point 2 miles north of Whitefish point light is S. 59° 30′ E. or 4° 20′ (or ⅜ of a point) more southerly than the range suggested as a check.

For information respecting Silver islet landing see Notice to Mariners No. 102 (256) of 1903; Slate islands light see Notice to Mariners No. 100 (254) of 1903; Otter island light see Notice to Mariners No. 100 (253) of 1903.

Michipicoten harbour.—Upon the southeast extremity of Little Gros Cap is erected a square wooden building, painted white, from the middle of whose roof is exhibited a fixed white light that, from a height of 70 feet above the lake, should be visible 14 miles. The ore wharf and commercial pier are situated in the northernmost cove of the harbour and alongside them the water has been dredged to 20 feet. In approaching the wharves bring the commercial pier on end (or the two red lights upon it, in one, if lighted) until the east face of the ore wharf opens when a vessel may haul over for the latter. The basin between the wharves (from 175 to 300 feet wide), has all been deepened to 20 feet, but the slip off the east side of the commercial pier is only 150 wide. There is a post office and a telegraph station here. In the cove between the wharves and the lighthouse, a shallow draft vessel will find good shelter and holding ground. The shore from the harbour to Brulé point is steep-to.

Brulé harbour is situated about a mile south of the point and affords excellent shelter with rather deep water. The southeast arm, about 11 fathoms deep, is nearly circular and has a very narrow entrance. The northern arm is larger and quite as deep. A shoal with 7 feet least water over it lies half a mile north of Cape Gargantua. Indian harbour is small and lies in the southeast corner of the bay 1½ miles east of the cape. It contains excellent anchorage and shelter. In entering, keep the south and west shores best aboard, to avoid some shoals in the entrance, and anchor off the old fishing shanties in the southwest corner of the harbour.

Commencing at Cape Gargantua and extending about 3½ miles southeast, is a string of small islands and rocks, the largest and highest of which is called Devils Warehouse island. S. by E. 1,400 yards from the westernmost island off the cape, and 500 yards off the island abreast of it, is a small rock with only 15 feet water over it. With this exception there are no shoals outside the line of the islands and rocks. For those locally acquainted there are good passages through the islands, with good anchorage and shelter in a bay about a mile north of Devils Warehouse island.

Gargantua harbour is a small harbour of refuge about four miles southeast of the cape. The entrance has a small island in it, upon which is a lighthouse tower that from a height of 95 feet above the water exhibits a fixed white light visible 15 miles. The harbour is in the northwest corner of the bay and is barely wide enough for fair sized vessels to ride at anchor. Larger craft tie up to a small wharf at the keeper's dwelling. Strangers are advised to enter the harbour by the passage south and east of the lighthouse as the other passage is partially obstructed by a shallow rock on each side.

For information concerning the shoals and channels about Leach and Gull islands see Notice to Mariners No. 89 (303) of 1902.

Lizard islands, seven in number, form a low group 2½ miles long N.N.E. and S.S.W. by half a mile wide, lying 5 miles E.S.E. of Leach island. Shoal water surrounds the group on the west side for three quarters of a mile, on the south for one quarter of a mile, on the east for 200 yards, and on the north 500 yards. The passage between the group and the main shore is three quarters of a mile wide and 20 fathoms deep.

A detached rock, with 20 feet least water over it (16 feet was reported, but nothing so shallow exists here), lies E. ½ S. 3 miles from the south point of the Lizards and two miles off shore.

A rock awash lies north 1¾ miles from the northwest point of Montreal island, leaving a channel over a mile wide and 20 fathoms deep.

Montreal island is nearly square, over 1½ miles each way, lying 6 miles southeast of the Lizards. Shoal water surrounds it for only a space of one-quarter of a mile.

Montreal shoal has been fully described in Notice to Mariners No. 71 (252) of 1902.

Agawa islands are a group of small islands and rocks lying in the west entrance to Agawa bay. Very little shallow water lies about them, the worst danger being a rock with 9 feet water over it, lying E. by S. 500 yards from the most easterly island. Good anchorage and fair shelter will be found off the northeast side of the largest and highest island, entrance being from either end of the channel. The whole shore from Gargantua harbour to Mamainse point may be approached to one quarter of a mile, and often closer.

Agawa bay is a large open indentation about 4 miles northeast of Montreal island. It has clean sandy shores, and good anchorage may be had with shelter from off-shore winds. Anchorage may be had also in the bay in the south side of old Point aux Mines. The passage between the small island, in its entrance, and the southwest part of the point is not good. The water in Mica bay is too deep for anchorage.

Mica shoal has been described in Notice to Mariners No. 64 (229) of 1902.

Hibbard rock is a small rock situated one mile S.S.W. of Mamainse point. It has no shallow water around it outside a distance of 50 yards. A channel 650 yards wide and 14 fathoms deep separates it from the shallow bank off Mamainse point.

Mamainse point forms the southwest entrance to the slight indentation called Mica bay. It bears S. S. E. ¼ E. 35 miles from the entrance to Gargantua harbour. The point is badly broken up into several islands and dry reefs.

Sand bay is situated 1½ miles south of Mamainse point. The bottom is between 3 and 7 fathoms deep over hard bottom.

Coppermine point is marked by a skeleton tower, from which is exhibited a fixed white light that from a height of 50 feet above water should be visible 13 miles. The shore from Sand bay to Coppermine point is badly broken up and is mostly fronted by reefs lying 200 or 300 yards off shore with very little shallow water outside them. There is a small fishing establishment on the north side of Coppermine point.

A detached rock 40 feet high lies 2,000 feet northwest of the light. A shoal with 13 feet water over it lies 500 yards N. N. W. of this rock, and another with 8 feet over it, lies 350 yards S. S. E. of the same. The shore from Coppermine to Pancake point is fronted by shallow water for an average distance of 200 yards, but a shallow reef will be found W. by N. 1,400 yards from the latter and a quarter of a mile off shore. From this to Corbay point the shore is clean but not very deep-to.

(5) BAY OF FUNDY—LURCHER SHOAL—LIGHTSHIP.

A lightship will be established off Lurcher shoal, which lies 16 miles outside of Yarmouth, in the Bay of Fundy, on or about 1st February, 1904. She will be moored in about 36 fathoms, 2 miles west of the 1½-fathom spot now marked by a whistling buoy.

Lat.	N.	43°	49′	32″
Long.	W.	66	32	0

She is a steel steamer, with two masts and no bowsprit. The hull is painted red, with the word "Lurcher" in white letters on each side, and the number of the vessel, "No. 14" on each bow. The circular gallery under the lanterns at each masthead, the smoke stack, and the fog signal between the masts, are all painted red.

Three seventh order lens lanterns encircle each masthead, at an elevation of 60 feet above the water. From them occulting electric lights, showing bright for 8 seconds and eclipsed for 4 seconds, alternately will be exhibited. These should be visible 13 miles from all points of approach. If from any cause the electric light apparatus should become inoperative fixed white oil lights, of less intensity, will be shown.

A diaphone, operated by compressed air, will be used as a fog alarm. This is similar in sound to a siren, but gives a note of great intensity and uniform pitch. It will give blasts of 4 seconds' duration, with intervals of 56 seconds between the blasts. Should it become disabled, blasts of similar duration and frequency will be sounded through a whistle. Should both from any cause become inoperative a bell will be rung by hand.

ARRETÉS EN CONSEIL.

[Renv. 853,955]

HOTEL DU GOUVERNEMENT A OTTAWA.

Samedi, le 8e jour de janvier 1904.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un Memorandum daté du 18 de décembre 1903 du ministre de l'Intérieur, disant que par inattention l'agent des terres fédérales à Winnipeg avait accordé une inscription de homestead à Gestur Sigurdsson pour le $\frac{1}{4}$ S. O. de la section 22, township 19, rang 2, ouest du 1er méridien, ce terrain ayant été préalablement transféré à la province du Manitoba comme terre marécageuse.

Le Ministre dit de plus que le gouvernement de la province du Manitoba a rendu l'arrêté en conseil nécessaire attribuant de nouveau le dit terrain au gouvernement fédéral afin que l'inscription de Mr. Sigurdsson soit confirmée.

Le Ministre recommande qu'en échange pour le terrain ainsi attribué le ¼ S. E. de la section 10, township 19, rang 2, ouest du 1er méridien, soit attribué à la Couronne pour les fins de la province du Manitoba.

Le comité soumet ce qui précède à l'approbation.

JOHN J. McGEE,
Greffier du Conseil privé.

Jeudi, le 26e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 8 de juin 1901, les ventes et inscriptions de homesteads dans la région y décrite pour des terres traversées par des rivières et grands cours d'eau, ont été limitées à un seul côté de celles des rivières et cours d'eau d'une dimension qui justifiait leur arpentage ; mais vu les frais et délais que cela entraînait, il a été jugé à propos de rescinder ce système,—

A ces causes il plaît au Gouverneur général en conseil d'ordonner et il ordonne que le dit arrêté en conseil du 8 de juin 1901, soit rescindé, et que le ministre de l'Intérieur soit autorisé à accorder des inscriptions, à volonté, renfermant des terres sur les deux côtés de rivières ou cours d'eau.

JOHN J. McGEE,
Greffier du Conseil privé.

Mardi, le 19e jour de janvier 1904.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un Memorandum daté le 4 janvier 1904, du ministre de la Marine et des Pêcheries, soumettant au sujet du chapitre 48 de la législation de 1903, par laquelle à compter du premier jour de janvier mil neuf cent quatre la rivière Saguenay a été détachée de la circonscription de pilotage dans le port de Québec, que l'effet de la dite législation a été de détacher la rivière Saguenay du contrôle de l'administration de pilotage par la circonscription de pilotage en bas de Québec, et la mettre sous la juridiction de l'*Acte du pilotage*, chapitre 80 des Statuts revisés du Canada.

A ces causes, le Ministre recommande qu'une circonscription de pilotage soit établie, sous la désignation de circonscription de pilotage pour la rivière Saguenay, avec les limites suivantes :—

"Comprendra toutes les eaux de marée de la rivière Saguenay et de ses tributaires, et les eaux du fleuve Saint-Laurent à son embouchure dans un rayon de sept milles depuis le feu d'alignement antérieur jusqu'à la Pointe Noire, sur le côté ouest de l'embouchure de la rivière.

Pilotage obligatoire.

Le Ministre recommande de plus que Messieurs C. P. Charlton, de la Baie Ste-Catherine, Saguenay, J. E. A. Dubuc, de Chicoutimi, et le capitaine William Blackburn, de Chicoutimi, soient nommés commissaires pour la susdite circonscription de pilotage.

Le comité soumet ce qui précède à l'approbation.

JOHN J. McGEE,
Greffier du Conseil privé.

Mercredi, le 13e jour de janvier 1904.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT qu'on a représenté que la largeur des allées entre les rangées d'animaux, etc., devrait être augmentée sur les navires engagés dans le transport du bétail depuis le Canada jusqu'à des ports dans le Royaume-Uni ; et il est jugé à propos que les règlements canadiens concernant le transport soient en conséquence modifiés,—

A ces causes, il plaît au Gouverneur général en conseil d'ordonner que le dernier paragraphe du quatrième article des règlements canadiens concernant l'expédition du bétail, tel que modifié par l'arrêté en conseil du 23 de juillet 1903, soit et il est par le présent abrogé, et remplacé par ce qui suit :—

"Les allées en front et entre les parcs servant à nourrir et abreuver les animaux doivent avoir une largeur de trois pieds, sauf aux bouts des allées dans la proue et la poupe du navire, et là où se trouvent des obstacles de moins de trois pieds de longueur la largeur sera réduite à un minimum de dix-huit pouces ; les allées en front et entre les parcs servant à nourrir et abreuver les chevaux doivent avoir une largeur minimum de trois pieds. Deux allées transversales ou plus, d'au moins dix-huit pouces de largeur doivent être laissées de chaque côté du pont de façon à ce que les dalots soient faciles d'accès et tenus libres. Pour les moutons, des allées transversales d'au moins dix-huit pouces pleins de largeur seront laissées entre les parcs et des allées d'avant en arrière trois pieds de largeur en front de chaque parc, sauf aux obstacles et aux bouts des allées, tel que prescrit pour les animaux, la largeur minimum peut être de dix-huit pouces. Lorsque les moutons sont parqués en deux étages, la largeur minimum des allées d'avant et d'arrière à la poupe et à la proue sera de deux pieds libres de toute obstruction. Un espace suffisant sera laissé aux côtés des écoutilles pour permettre d'atteindre facilement au fourrage dans la cale."

Il plaît de plus au Gouverneur général en conseil d'ordonner qu'aucune nourriture ou autre obstruction ne sera placée ou arrimée dans les allées.

JOHN J. McGEE,
Greffier du Conseil privé.

AVIS AUX NAVIGATEURS.

(*Avis de l'Atlantique No. 4.*)

Tous les relèvements, à moins d'avis contraire, sont magnétiques et sont donnés venant de la mer, les milles sont des milles marins, les hauteurs sont au dessus des hautes eaux et toutes les profondeurs sont à l'eau basse moyenne.

(6) **Fleuve Saint-Laurent en bas de Québec—Rive nord de la baie des Outardes—Rivière des Outardes—Rivière Bersimis—Bouées supprimées.**

On entretenait autrefois dans la baie des Outardes des bouées pour indiquer le mouillage des vaisseaux prenant des chargements de bois, et aux entrées de la rivière des Outardes et de la rivière Bersimis pour faciliter le passage des chalans employés à charger ces vaisseaux.

Les scieries à cet endroit ont cessé de fonctionner, et conséquemment les bouées qui y étaient entretenues par les propriétaires de scieries en vertu d'arrangements avec ce ministère, ont été abandonnées.

Dorénavant les navigateurs ne doivent pas s'attendre à trouver ces bouées dans la baie des Outardes, la rivière des Outardes ou la rivière Bersimis.

ON a Report dated 19th January, 1904, from the Minister of the Interior, stating that John Quirk, of Millarville, in the Provisional District of Alberta, has made application to purchase, for irrigation purposes, the whole Section 18 and the East half of Section 7, in Township 20 and Range 3, west of the 1st Meridian.

The Minister further states that these lands are clear according to the books of the Department of the Interior, but their total area exceeds the maximum area, 640 acres, which under the provisions of clause 29 of The Dominion Lands Act, one person may purchase, unless the authority of the Governor General in Council is first obtained.

The Minister recommends that Mr. Quirk be allowed to purchase such lands at the regulation price of $3.00 per acre, upon the usual terms, subject to his obtaining, under The North-West Irrigation Act, a license to divert water to irrigate these lands and bringing not less than 25 % thereof under irrigation.

The Committee submit the same for approval.

33-4 Clerk of the Privy Council.

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

On a Report dated 21st December, 1903, from the Minister of the Interior, stating that provision is made in paragraph (i) of section 1, chapter 5, of 60-61 Victoria, being an Act to authorize a subsidy for a railway through the Crows' Nest Pass, for the conveyance to the Crown in the interest of Canada of fifty thousand acres of coal-bearing land obtained by the Railway Company from the Government of British Columbia as a subsidy in connection with the construction of their line, such fifty thousand acres to be selected by the Government in such fair and equitable manner as might be determined by the Governor in Council and to be thereafter held or disposed of or otherwise dealt with by the Government as it might think fit, on such conditions as might be prescribed by the Governor in Council, for the purpose of securing a sufficient and suitable supply of coal to the public at reasonable prices, not exceeding two dollars per ton of two thousand pounds free on board cars at the mines.

The Minister further states that a selection of the area in question was made under the provisions of the above section of the Act and this selection was approved by an Order in Council of the 19th May, 1902.

The Minister recommends, as the Regulations for the sale of coal mining lands in Manitoba, the North-west Territories and the Province of British Columbia approved by Order in Council of the 19th May, 1902, would not appear to be applicable to the above area and would not meet the provisions of the said Act, that no mining regulations or other regulations for the sale or disposal of Dominion Lands shall apply to the area of 50,000 acres above referred to, or any part thereof, but that these lands shall only be disposed of as specially authorized by Order in Council.

The Committee submit the same for approval.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 7th day of December, 1903.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 26th February, 1903, from the Minister of the Interior, stating that in March, 1900, hydraulic mining lease No. 10 was issued in favour of Mr. Joseph W. Boyle of a tract of land extending for three and one-third miles along the west side of Quartz Creek, a tributary of the Indian River, in the Yukon Territory, which has since been assigned to the Quartz Creek (Yukon) Syndicate Limited, and the lessees right to water on this location, or to the diversion of water in connection with their operations thereon were made subject to the Regulations approved by the Governor General in Council on the 3rd of August, 1898.

The Minister further states that the lessees have now applied for permission to divert 1,000 miners' inches of water from Ruby Creek, a tributary of the Indian River on its left limit, for the operation of their location, also the right to take water, subject to the rights of placer miners, from such creeks or tributaries as may be crossed by the ditch or ditches constructed by them in connection with the grant which may be made to them.

This application was referred to the Honourable J. H. Ross, the Commissioner of the Territory for a report, and in reply he stated that the water from any creek or tributary crossed by a ditch should be applied for and granted as an original application in each case ; that before any portion of the water to be diverted is sold or disposed of by the grantees they should show conclusively that such water is for the use of the miners along the line of the ditch, and not for the benefit of any person or company who may have the right to sell water, and thereby control the supply ; that he is not aware of any objection to the applicants being permitted to divert water from Ruby Creek and the tributaries thereof which may be crossed by the ditch, also from Indian River, provided they do not in any way obstruct the latter stream or interfere with any operations which may be carried on thereon ; but that no water from creeks or tributaries entering the Indian River on its right limit along the line of the ditch or ditches should be granted to the applicants.

The Minister observes that the Regulations established by the Governor General in Council on the 3rd August, 1898, above referred to, provide that the Mining Recorder may, upon application, grant the right to divert water from any stream or lake in the Yukon Territory, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water, but by Order in Council dated the 7th of December, 1901, the provision made in these Regulations that the owner of a ditch or water privilege might sell or dispose of the water granted was rescinded.

The Minister in accordance with the report made by Mr. Ross, the former Commissioner of the Yukon Territory, recommends that the above Syndicate be granted the right to divert the quantity of water applied for from Ruby Creek, in accordance with the provisions of the Regulations approved by the Order in Council dated the 3rd of August, 1898, and the amendments thereto, also the right to apply to the Gold Commissioner for such grants as he deems proper to enable the Syndicate to divert water from the Indian River and from the creeks and tributaries on the left limit thereof, which may be crossed by the ditch or ditches constructed in connection with the grant which may be made to them, the works for the diversion of water to be constructed to the satisfaction of the Government Mining Engineer.

The Minister, also recommends that the Commissioner of the Yukon Territory may, under special circumstances, and upon such terms and conditions as may be approved by the Yukon Council, permit the grantees to dispose of a portion of the water which they may divert from Ruby Creek, and also a portion of the water which they may acquire under separate grants made in accordance with the provisions of the Regulations, from the creeks and tributaries which may be crossed by the ditch or ditches constructed by them, upon proof to the satisfaction of the Commissioner being furnished that such water is for the use of the miners along the line of the ditch or ditches, and not for the benefit of any person or company who may have the right to sell water.

The Committee submit the same for approval.

NOTICE TO MARINERS.

No. 1 of 1904.

(*Inland Notice No.* 1.)

All bearings, unless otherwise noted, are magnetic and are given from seaward, miles are nautical miles, heights are above high water, and all depths are at mean low water.

ONTARIO.

(1) LAKE SUPERIOR—SAILING DIRECTIONS.

The following preliminary sailing directions for portions of the Canadian shore of Lake Superior have been written by Mr. W. J. Stewart, in charge of the Canadian hydrographic survey of the great lakes, to replace the information contained in pages 20 and 21, 26 and 27 of bulletin No. 13 of the Survey of northern and northwestern lakes, published by the U. S. war department in 1903 :

Pigeon bay has deep water all along its south shore. The bay is not well suitable for anchoring in, as most of the water is very deep, and two small rocks (not shown on the chart) with 7 and 8 feet water over them, lie between Gull rocks (in the mouth of the south arm) and the mouth of Pigeon river.

(See N. to M. No. 95 (240) of 1903.)

Pine river bay, into which Pine river empties, is a shallow indentation 1½ miles north of Pigeon point. It is difficult of access, but contains good shelter and holding ground for small craft.

Pine point, 2 miles northeast of Pigeon point, is steep-to on all sides, and forms the southeast entrance point to Big Trout bay, which contains excellent shelter from all but northeast and east winds. The anchorage, however, is nearly all over 10 fathoms, but the shores are clean.

Cloud islands, three in number, with a detached rock one-quarter mile northeast, lie in the mouth of Big Trout bay. A very shallow spit makes out 250 yards southwest from the south island, and a rock with 9 feet over it lies 150 yards east-northeast from the north island. With these two exceptions, the shores of the islands and the detached rock are quite clean.

McKellar point, 2½ miles northeast of Pine point, is steep-to on all sides, and is the east entrance point to Little Trout bay, with clean shores, excellent anchorage in less than 10 fathoms, and shelter from all winds.

Cloud bay, one mile northwest of McKellar point, is really an arm of Little Trout bay. It contains limited anchorage space in its middle, the shores being shallow.

Sucker island is a small island 2 miles northeast of McKellar point. It is surrounded by shallow water for a distance of 200 yards. The shore between it and Cloud bay is deep-to.

Crystal island is half a mile east of Sucker island. It has very little shallow water off it.

Grassy point, a low gravel point, covered with grass, bears E.N.E. 3 miles from McKellar point and one mile N.N.E. from Victoria island lighthouse. It is important on account of the small rock with 6 feet water over it, lying 500 yards S. by W. of it. A red spar buoy marks this danger.

Jarvis point lies 1¼ miles northeast of Grassy point, and between them is a slight indentation with steep shores. It is deep-to on all sides.

Prince bay is an indentation about a mile square, lying to the westward of Jarvis point. In the north corner will be found shallow anchorage for small boats, and in the southwest corner limited space for larger craft.

Mink point, also steep-to, lies 2 miles northeast of Jarvis point.

Mink island, 1½ miles long, quite narrow and high, lies 750 yards northeast of Mink point. The island has deep water all round it, and the channel between the point and island is deep and clean.

Sister islands, two in number, lie half to one mile eastnortheast of the northeast end of Mink island. They are steep-to on all sides. A rock awash lies in the middle of the passage between Mink island and the Sisters, having good water between it and the latter, through which nearly all the boats pass. Another small rock with 5 feet over it, lies 500 yards eastnortheast of the northeast Sister island.

Sturgeon point, marked by a small islet off it, is situated 2½ miles eastnortheast from Mink point. It also is steep-to. The bay between its shore and Mink island is called Mink bay, and contains good anchorage in its southwest corner, between the two small islets there.

Sturgeon bay is a shallow bay with a narrow entrance, one mile east of Sturgeon point. Off the north shore of Sturgeon point will be found good anchorage.

North by east 1,200 yards from Sturgeon point and 400 yards off the shore abreast it, is a small boulder shoal, with only 4 feet water over it.

Flatland island is, in marked contrast to all the other islands in the vicinity, low and flat. From its southwest point, a reef and a long narrow island almost connect it with the mainland, but off the west side is an excellent harbour, with from 3 to 4½ fathoms water in it ; the entrance being from the north between Birch island and the mainland. From the southeast point of the island extend in an eastnortheasterly direction several small islands and rocks for a distance of 600 yards, the outer one being called Little Flatland island.

The south side of this string has very shoal water off it one quarter of a mile, but Little Flatland is clean on its north, south and east sides. A dangerous reef, with only 7 feet water over it, extends north by east 2,000 yards from the north side of Flatland island, to clear which, on the north end, keep the lower bluff on Thunder cape in sight north of Pie island bearing E. by N. ¾ N., and to pass east keep Spar island open east of Flatland island, bearing S. ½ E.

The shore from Birch island to Grand point is clean except for Squaw and Brulé bays (near Grand point) in which the water is not very deep. Off Grand point a very shallow bank lies about a quarter of a mile, leaving good water inside.

From Grand point to Port Arthur the shore is fronted by a shallow mud flat for an average distance of three quarters of a mile. The principal mouth of the Kaministikwia river and entrance to Fort William is situated 6 miles north of Grand point. The channel is dredged and the outer end marked by a platform buoy, surmounted by a wooden cage 8 feet high and painted red, from the top of which is exhibited a fixed white light visible 4 miles. The axis of the channel is marked by 2 range lights, on the shore near the C.P.R. coal pile, which exhibit fixed red lights visible 10 miles. Nineteen feet water may be carried into fort William (well marked by the numerous grain elevators), the principal harbour of the Canadian Pacific Railway Company, and from which large quantities of grain are shipped east. Sixteen feet water may be carried five miles up the river to the coal unloading plant of the Canadian Northern Railway.

Port Arthur is rendered safe by a breakwater parallel to the shore and about 2 miles long, the entrance being through a gap near the south end and marked by a fixed red light, 43 feet high, upon the northern portion of the breakwater. The channel is dredged and 19 feet may be carried to the Northern Railway Company's elevator. Port Arthur is the present terminus of the Canadian Northern Railway, and large quantities of freight pass through. The Pigeon river Lumber Company have a large saw mill here. Fort William and Port Arthur are connected by an electric railway and have a common telephone system.

Welcome islands, four in number, lie 4 miles southeast of the entrance to Fort William. The northern two are each about half a mile long, and a quarter of a mile wide, the other two are quite small. Shoal water extends a quarter of a mile south from both the northern and southern islands, all the other shores being clean. The channel between Welcome islands and Mutton island, off the mouth of the Kaministikwia river, is 1½ miles wide and from 4 to 8 fathoms deep.

Victoria island is the southernmost of a long narrow string of islands that stretches nearly to Thunder cape, a distance of 24 miles, and give shelter to an excellent channel from Victoria island to Port Arthur. The west point of this island is marked by a lighthouse exhibiting a fixed white light visible 10 miles from a height of 90 feet above the water, and off its point

extends in a westsouthwesterly direction, a shallow reef for 150 yards. This is especially dangerous for vessels entering or leaving the inside passage as it juts out into the channel. The bay south of lighthouse point is rather deep for anchoring, but the shores are clean.

Iroquois rock with 6 feet water on it lies 1000 yards west-southwest of the lighthouse point and is a dangerous rock leaving a deep channel over 700 yards wide between it and the reef off the lighthouse point. As the rock is very small vessels may pass upon either side of it. To pass north of it, keep Sugarloaf hill on Spar island in sight north of Victoria island, N. E. by E. ⅝ E. and to pass south of it, bring the northwest side of Spar island in line with the north side of Victoria island (lighthouse point) N. E. by E. It is proposed to keep this shoal buoyed in future.

Tiger island is the high black island lying a quarter of a mile south of Victoria island lighthouse. It and the small islands stretching 2 miles east of it are quite clean. There is a large cove in the east side of Victoria island, but the water in it is about 17 fathoms deep. A couple of shallow rocks lie off the dry rock at the southeast entrance to this cove, one is 300 yards northeast and the other 150 yards south of it. Another rock with only 4 feet water over it lies nearly in the middle of the entrance to the cove and must be carefully guarded against by keeping rather nearer the southwest side. The remainder of the south and all the north shore of Victoria island are quite deep-to.

Little Devil, Devil, and Jarvis islands are the next islands east of Victoria island. They are quite clean off their north and south sides. A narrow channel with 21 feet water in it exists between Devil and Jarvis islands. Spar is the next large island about 2½ miles long, northeast and southwest, by half a mile wide. A rock awash lies a quarter of a mile off a point on the northwest side and three quarters of a mile from the southwest end. With this exception the shores are clean. There is a safe clean passage a quarter of a mile wide between Spar and Jarvis islands with 15 fathoms water in it.

Thompson island lies with its southwest end 2 miles northeast of Spar island. It is 3 miles long northeast and southwest by half a mile in greatest width and is over 100 feet high. It has deep water all round it. In the gap between Spar and Thompson islands are several small islands and rocks, dry and sunken, with good passages between them, but which should not be attempted by strangers without a chart.

Stratching northeast from Thompson island for a mile to McKellar island are several small islands with no passages between, but which have good clean shores. The gap between these islands and Pie island is very deep and clear of obstructions.

Pie island, about 900 feet high, is about 7 miles long, east and west by 3½ wide, and has only slight indentations in its shores. Except the north and northeast, which should receive a berth of half a mile, the shores are clear of dangers. Good anchorage from southerly winds will be found off the north and northwest sides, and from northerly winds off the south side. Dawson bay in the south side is large, but the water is deep.

Pie island light, fixed white, 29 feet high, is situated on a narrow, rocky point on the southwest side of the island.

Steamboat and Deadman islands are small and lie from half to one mile off the southwest side of Pie island. They are clean outside a distance of 200 yards, and between them and Little Flatland island is a good clean passage, 1,500 yards wide and from 5 to 15 fathoms deep.

Angus islands are a small group, 6 in number, lying one mile southeast of the east point of Pie island. There is a shallow spit making out one quarter of a mile northeast from the north end of Angus islands, and with this exception the islands are clean.

Between the southwestern Angus island (a high bare peak) and Pie island are three shallow rocks, as follows: one awash lies W. by N. ¼ N., 2,000 yards from this Angus island; another with 4 feet water on it lies E. ¼ N., 3,500 yards from the south point of Pie island; and the other, and most important, with 6 feet water over it, is situated E. by S. ½ S., 2,500 yards from the same point. As this lies inside the line joining the outer Angus and McKellar islands, masters of vessels need not be so much afraid of this shore as they appear to be.

The passage between Pie island and Thunder cape, 4½ miles wide, is quite clean.

Thunder cape is a very prominent headland, about 800 feet high, marking the east entrance to Thunder bay. Upon its south end is a lighthouse tower, 45 feet high, exhibiting a revolving white light every minute, visible 12 miles. A steam fog horn sounds blasts of 5 seconds every half minute. All parts of the cape may be approached to 200 yards.

Hare island is small and low, bearing N. W. 1½ miles from the cape. It has shallow water extending south and north from it for a distance of 700 yards. To pass south of it keep the south end of Marvin island in line with Thunder cape, E. by S. The whole of the east shore of Thunder bay to its head is very clean.

Sawyer bay is situated 5 miles north from the cape and contains good shelter and holding ground from all winds except those between west and north.

A shoal with 16 feet water on it has been reported as lying N.E. by E ½ E., 3¼ miles from the north point of Welcome islands.

Vessels proceeding to Port Arthur and Fort William from the eastward should give Thunder cape a berth of at least one quarter of a mile heading for the middle of the Welcomes bearing W. N. W. As soon as Hare island comes abreast alter course to pass half a mile clear of the northeast end of the Welcomes, or heading upon Fort Arthur lighthouse, 13 miles.

If bound for Fort William, a vessel may keep this course until the range comes on, or for 9½ miles.

Vessels from Duluth for Port Arthur or Fort William in thick weather keep nearer Isle Royale and enter the by close to Thunder cape. There is no reason why vessels should not keep closer to the Canadian islands, give Angus island a berth of half a mile, and haul up N. W. by N. to clear the Welcomes by the same distance. In clear weather, vessels trading between Port Arthur and Duluth use the shorter and more sheltered passage west of Pie and Victoria islands. From Duluth for Port Arthur, shortly after passing Cloud islands bring the west side of Sister islands in line with Grassy point, N. E. ⅛ N., to pass between Iroquois rock and the reef of Victoria island. If these marks cannot be distinguished and there is no buoy on Iroquois rock a vessel should haul close to Tiger island and steer to pass 300 yards off Victoria island, until the east end of Tiger island comes in line with the west or lighthouse point of Victoria island. Now alter course to pass about 200 yards off the north side of Victoria island to avoid the 6-foot shoal off Grassy point. When abreast of Grassy point steer for the northwest side of Spar island for 2½ miles or until the west side of Pie island comes in line with the west side of the Sisters, bearing N. N. E. ¾ E :—keep on this range for 3¾ miles. This will clear the rock awash between the Sisters and Mink island. Pass through the passage giving west Sister a berth of 200 yards and head up for the west side of Pie island, bearing N. N. E. ¾ E., steering thus for 5½ miles until Pie island light comes abreast, when haul up N. ⅜ E. for 10 miles to give Welcome islands a berth of half a mile. As soon as the north end of the latter islands comes abreast, a vessel may haul over for the buoy off Fort William or keep on for the buoys off Port Arthur.

At night, those locally acquainted pass between Mink point and Mink island, giving the latter a berth of 200 yards, and haul up for Pie island light bearing N. E. ¼ N. until Deadman island comes abreast when they haul up for the Welcomes.

In leaving Port Arthur and Fort William, when clear of the entrance, head for south end of the Welcomes until about half a mile from them. Then steer to pass the same distance off the west shore of Pie island or heading for Deadman island. When Pie island light comes abreast, haul for the gap between the Sisters and Mink island, give the west end of West Sister a berth of 300 yards to avoid the rock awash

between it and Mink island. Now bring the west side of Pie island in line with the west side of the Sisters, heading for the west end of Jarvis island. As soon as the north side of Cloud islands comes in line with the north side of Victoria island, S. W. by W., keep it so, rounding the lighthouse point at a distance of 300 yards, taking care not to pass northwest of the line, north side of the Sisters in one with Grassy point, to avoid Iroquois rock.

Masters of vessels leaving Port Arthur or Fort William for Whitefish point will find a very good check for their course across the lake, by noticing the bearing by their own compasses of the range :—Thunder cape lighthouse in line with the north end of the Welcomes, S. 63° 50′ E. The average magnetic course across the lake from a point one mile south of Passage island light to a point 2 miles north of Whitefish point light is S. 59° 30′ E. or 4° 20′ (or ⅜ of a point) more southerly than the range suggested as a check.

For information respecting Silver islet landing see Notice to Mariners No. 102 (256) of 1903 ; Slate islands light see Notice to Mariners No. 100 (254) of 1903 ; Otter island light see Notice to Mariners No. 100 (253) of 1903.

Michipicoten harbour.—Upon the southeast extremity of Little Gros Cap is erected a square wooden building, painted white, from the middle of whose roof is exhibited a fixed white light that, from a height of 70 feet above the lake, should be visible 14 miles. The ore wharf and commercial pier are situated in the northernmost cove of the harbour and alongside them the water has been dredged to 20 feet. In approaching the wharves bring the commercial pier on end (or the two red lights upon it, in one, if lighted) until the east face of the ore wharf opens when a vessel may haul over for the latter. The basin between the wharves (from 175 to 300 feet wide), has all been deepened to 20 feet, but the slip off the east side of the commercial pier is only 150 wide. There is a post office and a telegraph station here. In the cove between the wharves and the lighthouse, a shallow draft vessel will find good shelter and holding ground. The shore from the harbour to Brulé point is steep-to.

Brulé harbour is situated about a mile south of the point and affords excellent shelter with rather deep water. The southeast arm, about 11 fathoms deep, is nearly circular and has a very narrow entrance. The northern arm is larger and quite as deep. A shoal with 7 feet least water over it lies half a mile north of Cape Gargantua. Indian harbour is small and lies in the southeast corner of the bay 1½ miles east of the cape. It contains excellent anchorage and shelter. In entering, keep the south and west shores best aboard, to avoid some shoals in the entrance, and anchor off the old fishing shanties in the southwest corner of the harbour.

Commencing at Cape Gargantua and extending about 3½ miles southeast, is a string of small islands and rocks, the largest and highest of which is called Devils Warehouse island. S. by E. 1,400 yards from the westernmost island off the cape, and 500 yards off the island abreast of it, is a small rock with only 15 feet water over it. With this exception there are no shoals outside the line of the islands and rocks. For those locally acquainted there are good passages through the islands, with good anchorage and shelter in a bay about a mile north of Devils Warehouse island.

Gargantua harbour is a small harbour of refuge about four miles southeast of the cape. The entrance has a small island in it, upon which is a lighthouse tower that from a height of 95 feet above the water exhibits a fixed white light visible 15 miles. The harbour is in the northwest corner of the bay and is barely wide enough for fair sized vessels to ride at anchor. Larger craft tie up to a small wharf at the keeper's dwelling. Strangers are advised to enter the harbour by the passage south and east of the lighthouse as the other passage is partially obstructed by a shallow rock on each side.

For information concerning the shoals and channels about Leach and Gull islands see Notice to Mariners No. 89 (303) of 1902.

Lizard islands, seven in number, form a low group 2½ miles long N.N.E. and S.S.W. by half a mile wide, lying 5 miles E.S.E. of Leach island. Shoal water surrounds the group on the west side for three quarters of a mile, on the south for one quarter of a mile, on the east for 200 yards, and on the north 500 yards. The passage between the group and the main shore is three quarters of a mile wide and 20 fathoms deep.

A detached rock, with 20 feet least water over it (16 feet was reported, but nothing so shallow exists here), lies E. ½ S. 3 miles from the south point of the Lizards and two miles off shore.

A rock awash lies north 1¾ miles from the northwest point of Montreal island, leaving a channel over a mile wide and 20 fathoms deep.

Montreal island is nearly square, over 1½ miles each way, lying 6 miles southeast of the Lizards. Shoal water surrounds it for only a space of one-quarter of a mile.

Montreal shoal has been fully described in Notice to Mariners No. 71 (252) of 1902.

Agawa islands are a group of small islands and rocks lying in the west entrance to Agawa bay. Very little shallow water lies about them, the worst danger being a rock with 9 feet water over it, lying E. by S. 500 yards from the most easterly island. Good anchorage and fair shelter will be found off the northeast side of the largest and highest island, entrance being from either end of the channel. The whole shore from Gargantua harbour to Mamainse point may be approached to one quarter of a mile, and often closer.

Agawa bay is a large open indentation about 4 miles northeast of Montreal island. It has clean sandy shores, and good anchorage may be had with shelter from off-shore winds. Anchorage may be had also in the bay in the south side of old Point aux Mines. The passage between the small island, in its entrance, and the southwest part of the point is not good. The water in Mica bay is too deep for anchorage.

Mica shoal has been described in Notice to Mariners No. 64 (229) of 1902.

Hibbard rock is a small rock situated one mile S.S. W. of Mamainse point. It has no shallow water around it outside a distance of 50 yards. A channel 650 yards wide and 14 fathoms deep separates it from the shallow bank off Mamainse point.

Mamainse point forms the southwest entrance to the slight indentation called Mica bay. It bears S. S. E. ¼ E. 35 miles from the entrance to Gargantua harbour. The point is badly broken up into several islands and dry reefs.

Sand bay is situated 1½ miles south of Mamainse point. The bottom is between 3 and 7 fathoms deep over hard bottom.

Coppermine point is marked by a skeleton tower, from which is exhibited a fixed white light that from a height of 50 feet above water should be visible 13 miles. The shore from Sand bay to Coppermine point is badly broken up and is mostly fronted by reefs lying 200 or 300 yards off shore with very little shallow water outside them. There is a small fishing establishment on the north side of Coppermine point.

A detached rock 40 feet high lies 2,000 feet northwest of the light. A shoal with 13 feet water over it lies 500 yards N. N. W. of this rock, and another with 8 feet over it, lies 350 yards S. S. E. of the same. The shore from Coppermine to Pancake point is fronted by shallow water for an average distance of 200 yards, but a shallow reef will be found W. by N. 1,400 yards from the latter and a quarter of a mile off shore. From this to Corbay point the shore is clean but not very deep-to.

(5) Bay of Fundy—Lurcher shoal—Lightship.

A lightship will be established off Lurcher shoal, which lies 16 miles outside of Yarmouth, in the Bay of Fundy, on or about 1st February, 1904. She will be moored in about 36 fathoms, 2 miles west of the 1½-fathom spot now marked by a whistling buoy.

Lat.	N.	43°	49′	32″
Long.	W.	66	32	0

She is a steel steamer, with two masts and no bowsprit. The hull is painted red, with the word "Lurcher" in white letters on each side, and the number of the vessel, "No. 14" on each bow. The circular gallery under the lanterns at each masthead, the smoke stack, and the fog signal between the masts, are all painted red.

Three seventh order lens lanterns encircle each masthead, at an elevation of 60 feet above the water. From them occulting electric lights, showing bright for 8 seconds and eclipsed for 4 seconds, alternately will be exhibited. These should be visible 13 miles from all points of approach. If from any cause the electric light apparatus should become inoperative fixed white oil lights, of less intensity, will be shown.

A diaphone, operated by compressed air, will be used as a fog alarm. This is similar in sound to a siren, but gives a note of great intensity and uniform pitch. It will give blasts of 4 seconds' duration, with intervals of 56 seconds between the blasts. Should it become disabled, blasts of similar duration and frequency will be sounded through a whistle. Should both from any cause become inoperative a bell will be rung by hand.

Buoys used to be maintained in Outarde bay, to indicate the mooring ground for vessels loading lumber, and in the entrances to Outarde river and Bersimis river to facilitate the passage of lighters used in loading such vessels.

The saw mills in that vicinity are not now in operation, and consequently the buoys in the above mentioned localities, formerly maintained by the saw mill owners under agreement with this Department, have been abandoned.

In future mariners need not expect to find any buoys in Outarde bay, Outarde river or Bersimis river.

Tous les sujets britanniques sont mis en garde contre toute violation de ces lois.

Les règlements suivants sont par le présent déclarés en vigueur immédiatement :—

Règle A.—Aucun navire de guerre de l'un ou de l'autre belligérent ne pourra se servir des eaux britanniques comme lieux de rendez-vous pour des fins guerrières ou pour se procurer des équipements de guerre, ni ne sortira des eaux britanniques avant qu'il ne se soit écoulé (24) vingt-quatre heures depuis le départ d'un navire de l'autre belligérent (que ce soit un navire de guerre ou un navire marchand.)

PROCLAMATION.

ATTENDU que l'Assemblée de Notre Parlement du Canada se trouve prorogée au vingt-deuxième jour du mois de février prochain, Néanmoins, pour certaines causes et considérations, Nous avons jugé à propos de la proroger de nouveau à JEUDI, le DIXIÈME jour du mois de MARS prochain, de manière que ni vous ni aucun de vous, n'êtes tenus de vous trouver en Notre Cité d'Ottawa le dit vingt-deuxième jour du mois de février prochain ; car Nous voulons que vous et chacun de vous à cet égard soyez exonérés ; vous commandant et par ces présentes, vous enjoignant, et à chacun de vous et tous autres y intéressés, de vous trouver personnellement en Notre dite CITÉ d'OTTAWA, JEUDI, le DIXIÈME jour du mois de MARS prochain, pour l'EXPÉDITION DES AFFAIRES, et y traiter, agir, et conclure sur les matières qui, par la faveur de Dieu, en Notre dit Parlement du Canada pourront, par le Conseil Commun de Notre dite Puissance, être ordonnés.

En foi de quoi, Nous avons fait émettre Nos présentes Lettres Patentes, et à icelles fait apposer le Grand Sceau du Canada. Témoin, Notre Très fidèle et Bien-aimé Cousin et Conseiller le Très honorable Sir Gilbert John Elliot, Comte de Minto et Vicomte Melgund de Melgund, comté de Forfar, dans la pairie du Royaume-Uni, Baron Minto de Minto, comté de Roxburgh, dans la pairie de la Grande-Bretagne, Baronnet de la Nouvelle-Ecosse, Chevalier Grand-croix de Notre Ordre Très distingué de Saint-Michel et Saint-George, etc., etc., Gouverneur Général du Canada.

ARRETÉS EN CONSEIL.

HOTEL DU GOUVERNEMENT A OTTAWA.

Samedi, le 8e jour de janvier 1904.

Présent :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un Memorandum daté du 18 de décembre 1903 du ministre de l'Intérieur, disant que par inattention l'agent des terres fédérales à Winnipeg avait accordé une inscription de homestead à Gestur Sigurdsson pour le $\frac{1}{4}$ S. O. de la section 22, township 19, rang 2, ouest du 1er méridien, ce terrain ayant été préalablement transféré à la province du Manitoba comme terre marécageuse.

Le Ministre dit de plus que le gouvernement de la province du Manitoba a rendu l'arrêté en conseil nécessaire attribuant de nouveau le dit terrain au gouvernement fédéral afin que l'inscription de Mr. Sigurdsson soit confirmée.

Le Ministre recommande qu'en échange pour le terrain ainsi attribué le ¼ S. E. de la section 10, township 19, rang 2, ouest du 1er méridien, soit attribué à la Couronne pour les fins de la province du Manitoba.

Le comité soumet ce qui précède à l'approbation.

JOHN J. McGEE,
Greffier du Conseil privé.

HOTEL DU GOUVERNEMENT A OTTAWA.

Jeudi, le 26e jour de novembre 1903.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT que par arrêté en conseil du 8 de juin 1901, les ventes et inscriptions de homesteads dans la région y décrite pour des terres traversées par des rivières et grands cours d'eau, ont été limitées à un seul côté de celles des rivières et cours d'eau d'une dimension qui justifiait leur arpentage ; mais vu les frais et délais que cela entraînait, il a été jugé à propos de rescinder ce système,—

A ces causes il plaît au Gouverneur général en conseil d'ordonner et il ordonne que le dit arrêté en conseil du 8 de juin 1901, soit rescindé, et que le ministre de l'Intérieur soit autorisé à accorder des inscriptions, à volonté, renfermant des terres sur les deux côtés de rivières ou cours d'eau.

JOHN J. McGEE,
Greffier du Conseil privé.

Tous les relèvements, à moins d'avis contraire, sont magnétiques et sont donnés venant de la mer, les milles sont des milles marins, les hauteurs sont au-dessus des hautes eaux et toutes les profondeurs sont à l'eau basse moyenne.

(6) **Fleuve Saint-Laurent en bas de Québec—Rive nord de la baie des Outardes—Rivière des Outardes—Rivière Bersimis—Bouées supprimées.**

On entretenait autrefois dans la baie des Outardes des bouées pour indiquer le mouillage des vaisseaux prenant des chargements de bois, et aux entrées de la rivière des Outardes et de la rivière Bersimis pour faciliter le passage des chalans employés à charger ces vaisseaux.

Les scieries à cet endroit ont cessé de fonctionner, et conséquemment les bouées qui y étaient entretenues par les propriétaires de scieries en vertu d'arrangements avec ce ministère, ont été abandonnées.

Dorénavant les navigateurs ne doivent pas s'attendre à trouver ces bouées dans la baie des Outardes, la rivière des Outardes ou la rivière Bersimis.

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 7th day of December, 1903.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

On a Report dated 26th February, 1903, from the Minister of the Interior, stating that in March, 1900, hydraulic mining lease No. 10 was issued in favour of Mr. Joseph W. Boyle of a tract of land extending for three and one-third miles along the west side of Quartz Creek, a tributary of the Indian River, in the Yukon Territory, which has since been assigned to the Quartz Creek (Yukon) Syndicate Limited, and the lessees right to water on this location, or to the diversion of water in connection with their operations thereon were made subject to the Regulations approved by the Governor General in Council on the 3rd of August, 1898.

The Minister further states that the lessees have now applied for permission to divert 1,000 miners' inches of water from Ruby Creek, a tributary of the Indian River on its left limit, for the operation of their location, also the right to take water, subject to the rights of placer miners, from such creeks or tributaries as may be crossed by the ditch or ditches constructed by them in connection with the grant which may be made to them.

This application was referred to the Honourable J. H. Ross, the Commissioner of the Territory for a report, and in reply he stated that the water from any creek or tributary crossed by a ditch should be applied for and granted as an original application in each case; that before any portion of the water to be diverted is sold or disposed of by the grantees they should show conclusively that such water is for the use of the miners along the line of the ditch, and not for the benefit of any person or company who may have the right to sell water, and thereby control the supply; that he is not aware of any objection to the applicants being permitted to divert water from Ruby Creek and the tributaries thereof which may be crossed by the ditch, also from Indian River, provided they do not in any way obstruct the latter stream or interfere with any operations which may be carried on thereon; but that no water from creeks or tributaries entering the Indian River on its right limit along the line of the ditch or ditches should be granted to the applicants.

The Minister observes that the Regulations established by the Governor General in Council on the 3rd August, 1898, above referred to, provide that the Mining Recorder may, upon application, grant the right to divert water from any stream or lake in the Yukon Territory, and the right of way through and entry upon any mining ground for the purpose of constructing ditches and flumes to convey such water, but by Order in Council dated the 7th of December, 1901, the provision made in these Regulations that the owner of a ditch or water privilege might sell or dispose of the water granted was rescinded.

The Minister in accordance with the report made by Mr. Ross, the former Commissioner of the Yukon Territory, recommends that the above Syndicate be granted the right to divert the quantity of water applied for from Ruby Creek, in accordance with the provisions of the Regulations approved by the Order in Council dated the 3rd of August, 1898, and the amendments thereto, also the right to apply to the Gold Commissioner for such grants as he deems proper to enable the Syndicate to divert water from the Indian River and from the creeks and tributaries on the left limit thereof, which may be crossed by the ditch or ditches constructed in connection with the grant which may be made to them, the works for the diversion of water to be constructed to the satisfaction of the Government Mining Engineer.

The Minister, also recommends that the Commissioner of the Yukon Territory may, under special circumstances, and upon such terms and conditions as may be approved by the Yukon Council, permit the grantees to dispose of a portion of the water which they may divert from Ruby Creek, and also a portion of the water which they may acquire under separate grants made in accordance with the provisions of the Regulations, from the creeks and tributaries which may be crossed by the ditch or ditches constructed by them, upon proof to the satisfaction of the Commissioner being furnished that such water is for the use of the miners along the line of the ditch or ditches, and not for the benefit of any person or company who may have the right to sell water.

The Committee submit the same for approval.

The Minister further states that these lands are clear according to the books of the Department of the Interior, but their total area exceeds the maximum area, 640 acres, which under the provisions of clause 29 of The Dominion Lands Act, one person may purchase, unless the authority of the Governor General in Council is first obtained.

The Minister recommends that Mr. Quirk be allowed to purchase such lands at the regulation price of $3.00 per acre, upon the usual terms, subject to his obtaining, under The North-West Irrigation Act, a license to divert water to irrigate these lands and bringing not less than 25 % thereof under irrigation.

The Minister further states that the Government of the Province of Manitoba has passed the necessary Order in Council re-vesting the said land in the Dominion Government in order that Mr. Sigurdsson's entry may be confirmed.

The Minister recommends that in exchange for the land so re-vested the S.E. ¼ of Section 10, Township 19, Range 2, West First Meridian, be vested in the Crown for the purposes of the Province of Manitoba.

Friday, the 8th day of January, 1904.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 21st December, 1903, from the Minister of the Interior, stating that provision is made in paragraph (i) of section 1, chapter 5, of 60-61 Victoria, being an Act to authorize a subsidy for a railway through the Crows' Nest Pass, for the conveyance to the Crown in the interest of Canada of fifty thousand acres of coal-bearing land obtained by the Railway Company from the Government of British Columbia as a subsidy in connection with the construction of their line, such fifty thousand acres to be selected by the Government in such fair and equitable manner as might be determined by the Governor in Council and to be thereafter held or disposed of or otherwise dealt with by the Government as it might think fit, on such conditions as might be prescribed by the Governor in Council, for the purpose of securing a sufficient and suitable supply of coal to the public at reasonable prices, not exceeding two dollars per ton of two thousand pounds free on board cars at the mines.

The Minister further states that a selection of the area in question was made under the provisions of the above section of the Act and this selection was approved by an Order in Council of the 19th May, 1902.

The Minister recommends, as the Regulations for the sale of coal mining lands in Manitoba, the North-west Territories and the Province of British Columbia approved by Order in Council of the 19th May, 1902, would not appear to be applicable to the above area and would not meet the provisions of the said Act, that no mining regulations or other regulations for the sale or disposal of Dominion Lands shall apply to the area of 50,000 acres above referred to, or any part thereof, but that these lands shall only be disposed of as specially authorized by Order in Council.

The Committee submit the same for approval.

32–4 Clerk of the Privy Council.

NORTH ATLANTIC OCEAN.

(14) NEWFOUNDLAND—OFF THE SOUTHERN AND EASTERN COASTS—CURRENTS MET ON THE STEAMSHIP ROUTES.

During the season of 1903, from May to September' these currents were investigated by the Tidal and Current Survey, in this Department. The D.G.S. "Gulnare," equipped with modern appliances, was employed for the purpose. The steamer was anchored at various stations while the surface and under currents were examined, their speed measured by current-meters registering electrically, and their direction noted every half-hour, day and night. The observations also included a continuous wind and barometer record from instruments on board; water-temperatures to a depth of 30 fathoms; and a record of the tide on a self-registering tide gauge placed in the harbour nearest Cape Race. Valuable information was also obtained from the fishermen in the region.

The investigation had special reference to the question of indraught into the larger bays on the south coast; and the behaviour of the Polar current which follows the eastern coast. A report now in press will describe the nature of the currents in these regions, the tidal characteristics which they all show in a greater or less degree, and the effect of the wind upon them.

In the meantime, we may draw attention to the following notes, which result from the observations taken at points along the steamship route:

(1) When more than five miles from shore, there are no currents at any time throughout the season which exceed one knot in any direction. The only exception to this is the Polar current in which a maximum speed of 1·15 knots was observed. This emphatically contradicts the statements so often made that strong currents are there met with.

(2) On the south coast, when not more than four or five miles from the shore, the current is chiefly governed by the tide, and sets in the two opposite directions alternately, but the farther out the point of observation, the greater the tendency for the direction of the current to veer completely around the compass.

(3) The water makes north-westward on the whole, along the southern coast, from Cape Race towards Placentia bay. On the charts there are arrows which show a "constant current" in that direction; but these must be taken to mean that the set is a little stronger or more frequent towards the point they indicate, than towards any other point around the compass to which the current may set.

(4) With regard to indraught towards the bays, the water makes inwards on the whole on the eastern side of Placentia bay, in the same sense that it makes northwestward along the south coast. A corresponding indraught is felt at certain times of the tide on the east side of St. Mary's bay. These indraughts are included in the above note as to the strength of the currents generally. At any offing above 5 miles, they do not exceed one knot. Close to the headlands, there may no doubt be local streams of greater strength.

(5) The Polar current sets very constantly to the southwest, for a width of 30 or 40 miles off the eastern coast. During times of disturbance, it may set south-eastward, or even be reversed, on the surface. When such disturbance occurs, it is usually for part of a day immediately before a gale comes on.

(4) GULF AND RIVER ST. LAWRENCE—GASPÉ TO QUEBEC—LIST OF SHIP CHANNEL BUOYS.

On the following sheet will be found tabulated a complete list to date of buoys in the ship channel of the River St. Lawrence from Gaspé to Quebec, prepared by the Chief Engineer of the Department of Marine and Fisheries, chiefly from personal inspection.

These buoys will in future be numbered consecutively from Gaspé westward, and will bear the letter "B" (Below Quebec). The names heretofore on some of the buoys will be replaced by these numbers when the buoys are set out next spring.

All the buoys in this list within the pilotage district are set out as early as possible after the ice passes down each spring and are left out until after the 10th November each autumn, the date varying with the season, and every effort being made to leave them out as long as the state of the ice will permit, but belated vessels must not expect to find the buoys in position after the ice has begun to run. Some of the more important buoys, if lifted before the last vessels have passed out, are temporarily replaced by wooden spars, in which case the pilots are duly notified, and no special notices to mariners describing the removal or replacing of buoys each season are considered necessary.

ONTARIO.

(1) LAKE SUPERIOR—SAILING DIRECTIONS.

The following preliminary sailing directions for portions of the Canadian shore of Lake Superior have been written by Mr. W. J. Stewart, in charge of the Canadian hydrographic survey of the great lakes, to replace the information contained in pages 20 and 21, 26 and 27 of bulletin No. 13 of the Survey of northern and northwestern lakes, published by the U. S. war department in 1903 :

Pigeon bay has deep water all along its south shore. The bay is not well suitable for anchoring in, as most of the water is very deep, and two small rocks (not shown on the chart) with 7 and 8 feet water over them, lie between Gull rocks (in the mouth of the south arm) and the mouth of Pigeon river.

(See N. to M. No. 95 (240) of 1903.)

Pine river bay, into which Pine river empties, is a shallow indentation 1½ miles north of Pigeon point. It is difficult of access, but contains good shelter and holding ground for small craft.

Pine point, 2 miles northeast of Pigeon point, is steep-to on all sides, and forms the southeast entrance point to Big Trout bay, which contains excellent shelter from all but northeast and east winds. The anchorage, however, is nearly all over 10 fathoms, but the shores are clean.

Cloud islands, three in number, with a detached rock one-quarter mile northeast, lie in the mouth of Big Trout bay. A very shallow spit makes out 250 yards southwest from the south island, and a rock with 9 feet over it lies 150 yards east-northeast from the north island. With these two exceptions, the shores of the islands and the detached rock are quite clean.

McKellar point, 2½ miles northeast of Pine point, is steep-to on all sides, and is the east entrance point to Little Trout bay, with clean shores, excellent anchorage in less than 10 fathoms, and shelter from all winds.

Cloud bay, one mile northwest of McKellar point, is really an arm of Little Trout bay. It contains limited anchorage space in its middle, the shores being shallow.

Sucker island is a small island 2 miles northeast of McKellar point. It is surrounded by shallow water for a distance of 200 yards. The shore between it and Cloud bay is deep-to.

Crystal island is half a mile east of Sucker island. It has very little shallow water off it.

Grassy point, a low gravel point, covered with grass, bears E.N.E. 3 miles from McKellar point and one mile N.N.E. from Victoria island lighthouse. It is important on account of the small rock with 6 feet water over it, lying 500 yards S. by W. of it. A red spar buoy marks this danger.

Jarvis point lies 1¼ miles northeast of Grassy point, and between them is a slight indentation with steep shores. It is deep-to on all sides.

Prince bay is an indentation about a mile square, lying to the westward of Jarvis point. In the north corner will be found shallow anchorage for small boats, and in the southwest corner limited space for larger craft.

Mink point, also steep-to, lies 2 miles northeast of Jarvis point.

Mink island, 1½ miles long, quite narrow and high, lies 750 yards northeast of Mink point. The island has deep water all round it, and the channel between the point and island is deep and clean.

Sister islands, two in number, lie half to one mile eastnortheast of the northeast end of Mink island. They are steep-to on all sides. A rock awash lies in the middle of the passage between Mink island and the Sisters, having good water between it and the latter, through which nearly all the boats pass. Another small rock with 5 feet over it, lies 500 yards eastnortheast of the northeast Sister island.

Sturgeon point, marked by a small islet off it, is situated 2½ miles eastnortheast from Mink point. It also is steep-to. The bay between its shore and Mink island is called Mink bay, and contains good anchorage in its southwest corner, between the two small islets there.

Sturgeon bay is a shallow bay with a narrow entrance, one mile east of Sturgeon point. Off the north shore of Sturgeon point will be found good anchorage.

North by east 1,200 yards from Sturgeon point and 400 yards off the shore abreast it, is a small boulder shoal, with only 4 feet water over it.

Flatland island is, in marked contrast to all the other islands in the vicinity, low and flat. From its southwest point, a reef and a long narrow island almost connect it with the mainland, but off the west side is an excellent harbour, with from 3 to 4½ fathoms water in it ; the entrance being from the north between Birch island and the mainland. From the southeast point of the island extend in an eastnortheasterly direction several small islands and rocks for a distance of 600 yards, the outer one being called Little Flatland island.

The south side of this string has very shoal water off it one quarter of a mile, but Little Flatland is clean on its north, south and east sides. A dangerous reef, with only 7 feet water over it, extends north by east 2,000 yards from the north side of Flatland island, to clear which, on the north end, keep the lower bluff on Thunder cape in sight north of Pie island bearing E. by N. ¾ N., and to pass east keep Spar island open east of Flatland island, bearing S. ½ E.

The shore from Birch island to Grand point is clean except for Squaw and Brulé bays (near Grand point) in which the water is not very deep. Off Grand point a very shallow bank lies about a quarter of a mile, leaving good water inside.

From Grand point to Port Arthur the shore is fronted by a shallow mud flat for an average distance of three quarters of a mile. The principal mouth of the Kaministikwia river and entrance to Fort William is situated 6 miles north of Grand point. The channel is dredged and the outer end marked by a platform buoy, surmounted by a wooden cage 8 feet high and painted red, from the top of which is exhibited a fixed white light visible 4 miles. The axis of the channel is marked by 2 range lights, on the shore near the C.P.R. coal pile, which exhibit fixed red lights visible 10 miles. Nineteen feet water may be carried into fort William (well marked by the numerous grain elevators), the principal harbour of the Canadian Pacific Railway Company, and from which large quantities of grain are shipped east. Sixteen feet water may be carried five miles up the river to the coal unloading plant of the Canadian Northern Railway.

Port Arthur is rendered safe by a breakwater parallel to the shore and about 2 miles long, the entrance being through a gap near the south end and marked by a fixed red light, 43 feet high, upon the northern portion of the breakwater. The channel is dredged and 19 feet may be carried to the Northern Railway Company's elevator. Port Arthur is the present terminus of the Canadian Northern Railway, and large quantities of freight pass through. The Pigeon river Lumber Company have a large saw mill here. Fort William and Port Arthur are connected by an electric railway and have a common telephone system.
